

REPORT ON DIFFERENT ASPECTS OF MIGRANTS AND RETURN MIGRANTS

DIRECTORATE OF ECONOMICS AND STATISTICS
GOVERNMENT OF KERALA
THIRUVANANTHAPURAM

**Report on
Different Aspects of Migrants
And
Return Migrants**

Department of Economics & Statistics

December 2013

Preface

Migration from one country to another country has become a common phenomenon. According to International Organization for Migration, the term migrant was usually understood to cover all cases where the decision to migrate was taken freely by the individual concerned for moving to another country or region to better their material or social conditions and improve the prospect for themselves or their family. Migration from Kerala to foreign countries and to other states has now become so frequent and it has its own impact in the economy of the state.

Department of Economics and Statistics has conducted a survey on Activity Status of Migrants and Returnees in 1999 to study the various aspects of people migrated from Kerala. As the recent economic changes have altered the status of the migrants, it is essential to update the data on different aspects of migrants and returnees. In this context, the Government have accorded sanction to conduct a sample survey to study the different aspects of migrants and return migrants.

This report was prepared by the Survey Design Division of the Directorate of Economics & Statistics. The data was collected by the field staffs under the direct supervision of the District level officers under the guidance of the Deputy Directors of the district offices. The data processing and table generation were done by the staffs of the Computer Division of the Directorate. I am thankful to all of them. Admirable cooperation extended by the informants of the sample households is also acknowledged.

Suggestions for improvement of the content of the report will be highly appreciated.

Chapter 1

Introduction

Survey on Migrants and Return migrants of Kerala

- 1.1 Migration from Kerala to foreign countries and to other states has now become so frequent and it has its own impact in the economy of the state. After the independence in 1947, migration became a way of life to many of the educated youths of the state. Migration is mainly classified into two categories, viz internal migration and emigration.
- 1.2 As a result of migration, the regional economy of Kerala has witnessed a structural change in terms of income and Employment during the last four decades. The increasing rate of emigration and the resulting inflow of large volumes of remittances have significant influence in the labour market, consumption, savings, investment and income distribution. Since Kerala has an industrially backward economy, internal migration and emigration has a remarkable role in determining the economic well being of people.
- 1.3 But now the migrated people have their own problems because of the sudden changes in the global economy. Global economic recession has led the migrants to return to their homeland due to unemployment problem there in. The policies of promoting the native employment, abandonment of large scale construction and economic crisis in the oil industry have pushed the marginal and low paid migrant workers in many foreign countries, particularly gulf countries to return to India temporarily or permanently.
- 1.4 Department of Economics and Statistics has conducted a survey on Activity Status of Migrants and Return migrants in 1999 to study the various aspects of people migrated from Kerala. As the recent economic

changes have altered the status of the migrants, it was felt essential to update the data on different aspects of migrants and return migrants, especially on return migrants and their problems. In this context, this sample survey was planned and conducted in 2010-11. The survey started in the month of December 2010 and completed in the month of March 2011.

Objectives

- 1) To study the demographic particulars and family status of the migrants.
- 2) To estimate the total number of return migrants to the state especially due to the financial crisis.
- 3) To study the return migrants problems.
- 4) To study the effect of the financial crisis on the state economy.
- 5) To estimate the total foreign remittance to Kerala Economy.

Methodology

1.5 State is divided into different stratum Viz. Corporation, Municipality and Panchayat and 10% wards are selected from each stratum using circular systematic sampling. The houses of the wards are grouped into clusters of 50 houses. One-third of these clusters are selected using circular systematic sampling and visited all households in the selected cluster for data collection. Details of all migrants and return migrants collected in the detailed schedule and the method of data collection were direct enquiry method. The field work was entrusted with the investigators of the Department in addition to their normal duties.

Characteristics of population and households.

1.6 The Survey covered 2.67 lakhs households in the State, which is more than 2 percent of the total households. The sample size is considered quite sufficient for reliable estimates. The number of sample households surveyed in each district is given in Table below.

District	No of Households	Total family members
Kasargod	8,717	43,456
Kannur	17,531	88,588
Wayanad	6,715	29,231
Kozhikode	23,186	1,09,866
Malappuram	25,347	1,43,114
Palakkad	26,015	1,22,381
Thrissur	25,351	1,11,738
Ernakulam	25,879	1,09,253
Idukki	10,425	45,851
Kottayam	17,496	75,901
Alappuzha	18,725	80,231
Pathanamthitta	11,859	50,665
Kollam	23,100	98,215
Thiruvananthapuram	26,599	1,11,698
Total	2,66,945	12,20,188

1.7 The total number of households in the state is estimated at 67.23 lakhs. Among the districts, Thiruvananthapuram district has maximum number of households i.e. 6.95 lakhs households followed by Thrissur district with 6.64 lakhs households. Wayanad district has the least number of households with 1.59 lakhs followed by Kasargod district with 2.46 lakhs households.

1.8 The survey results show that the average family size is 4.56 for the state. Among the Districts the average family size is maximum in Malappuram with 5.64 followed by Kannur (5.03). The average size is least in Ernakulam and Thiruvananthapuram with 4.21. The District-wise no of households, population and average size are given in table below.

Comparison Of Households, Family Members And Average Size

District	No of Households (in lakhs)	Total family members (in lakhs)	Average size
Kasargod	2.46	12.17	4.95
Kannur	4.25	21.37	5.03
Wayanad	1.59	6.94	4.36
Kozhikode	5.47	25.87	4.73
Malappuram	6.47	36.46	5.64
Palakkad	6.64	31.30	4.72
Thrissur	6.64	29.35	4.42
Ernakulam	6.59	27.73	4.21
Idukki	2.80	12.33	4.40
Kottayam	4.21	18.26	4.34
Alappuzha	4.64	19.88	4.29
Pathanamthitta	2.96	12.65	4.27
Kollam	5.57	23.68	4.25
Thiruvananthapuram	6.95	29.26	4.21
Total	67.23	307.22	4.56

1.9 One of the objectives is to have an idea about the picture on the socio-economic condition of migrant families. As the survey was conducted in the households, households are classified in to three groups namely households with migrants, households with return migrants and household with immigrants. It is stated that there are 67.23 lakhs household in the state with a population of 307.22 lakhs persons. There are 3.41 lakh Keralites residing out side the state (NRKs) but with in the country. The number of Keralites staying out side India (NRIs) is 14.25 lakhs. Out of this 17.66 lakhs (i.e. 3.41+14.25) migrants 12.90 lakhs are employed in different countries, 2.43 in different states with in India and the remaining 2.33 lakhs are their dependents(job seekers and dependents) in the migrant countries and states. These 17.66 lakhs migrants are not included in the category of usual resident i.e. the population of the state (307.22) given above. Among the

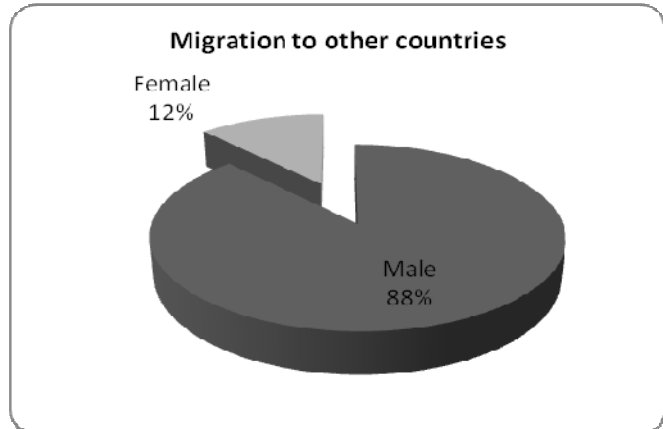

population of 307.22 lakhs there are 2.39 lakhs return migrants from abroad and 21.2 thousand return migrants from other states i.e., those who were abroad and in other states and at present staying in homeland. See Tables 2 & 3.

- 1.10 The different group of households (households with migrants, households with return migrants and household with immigrants) were analysed separately about the extent of land possessed, house owned, basic facilities, vehicles, bank accounts, monthly expenditure, monthly income, capital investment made during the last 5 years, loan liability during the last 10 years etc. The details of migrants are given in chapter 2&3 and that of Return migrants in Chapter 4&5.

Chapter 2

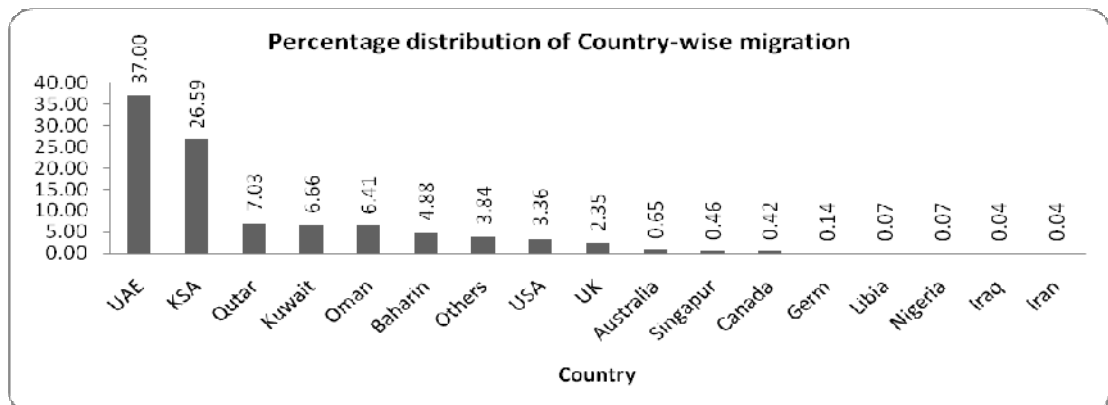

Migration to other countries

2.1 The survey revealed that 14.25 lakhs Keralites are staying outside India. It is observed that more than 4.2% of the people permanently residing in the state. Out of the total of 14.25 lakhs persons residing abroad, male population is 12.54 lakhs and female population is 1.70 lakhs. Sex-wise distribution of migrants is presented in Table-6 and age group wise distribution of migrants is presented in Table-5.

2.2 Out of the total 14.25 lakhs persons residing abroad,. 12.33 lakhs are employed and the remaining 1.92 lakhs are their dependents. The country -wise migrants, employed migrants, Dist. wise employed migrants, sex-wise distribution of migrants, religion wise and category wise distribution of migrants etc. are presented in tables 4, 5, 6 ,9, 10 and 12.

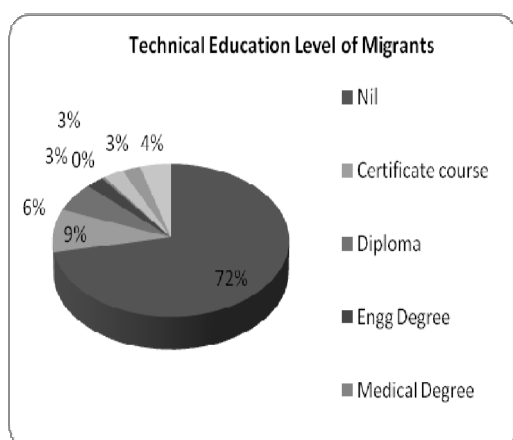

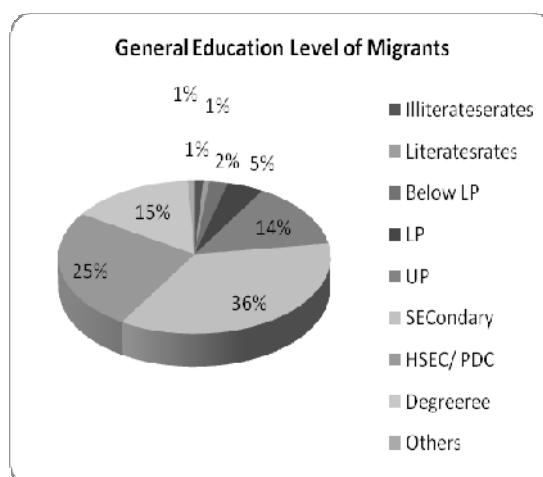

2.3 The estimated numbers of migrant employees is the highest in

U.A.E with 5.27 lakhs followed by Saudi Arabia with 3.79 lakhs. UAE and Saudi Arabia together constituted more than 64% of the migrants. The estimated number of migrant employees is least in Iran with 630 followed by Iraq with 636. The country-wise District-wise no of migrants are given Table-4.

2.4 Out of 14.25 lakhs migrants' 12.33 lakhs are employed. Among the districts, in Malappuram, 93.43% of the migrants are employed. The least being in Kottayam with a percentage of 74% where the reason for the migration of 4% of them were in search of employment and reason for migration of 3.47% of them were for education. 13% of the migrants from Kasaragod were found migrated in search of employment. The detailed data of reason for migration, district-wise, is presented in Table-12.

2.5 The education (general and technical) status, nature of Job, sector in which employed, and type of employer, are classified and analyzed in the tables 7, 8, 15 and 16. The survey reveals that 71.85% of the employed migrants have no technical qualification. 20.80% of migrants from Idukki and 14.89%

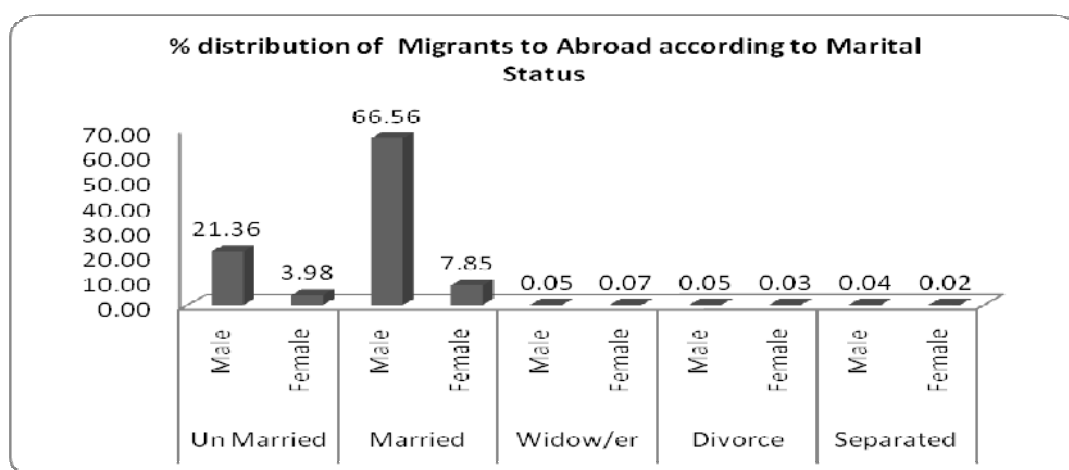

of migrants from Kottayam posses nursing degree. This can be connected with the relatively high female population of migrants from the districts of Idukki (41%) and Kottayam (36%). In case of General Education level, 35.96% of the migrants posses secondary

education and 15.15% of them were graduates. Illiterates, Literates, Below LP and LP holders together constitute 8.61% of the total migrants.

2.6 The migrants are employed in various institutions under different sectors like Govt/Semi Govt, Corporation/board/PSU, Bank/Financial Institutions, Private sector, Farmer, Traditional Labour, Agriculture Labour, Non- Agriculture Labour, Business/Trade, Self Employed and Other Labours. Among the different categories, maximum numbers of migrants (62.26%) are working in the private sector and 7.157% reported to be in the category of “other labours”, which is mainly due to lack of proper information of the informants. Out of the migrants, 1.31% of them are self-employed. The district wise number of migrants employed in each type of institution and their percentage are given in the Table-15.

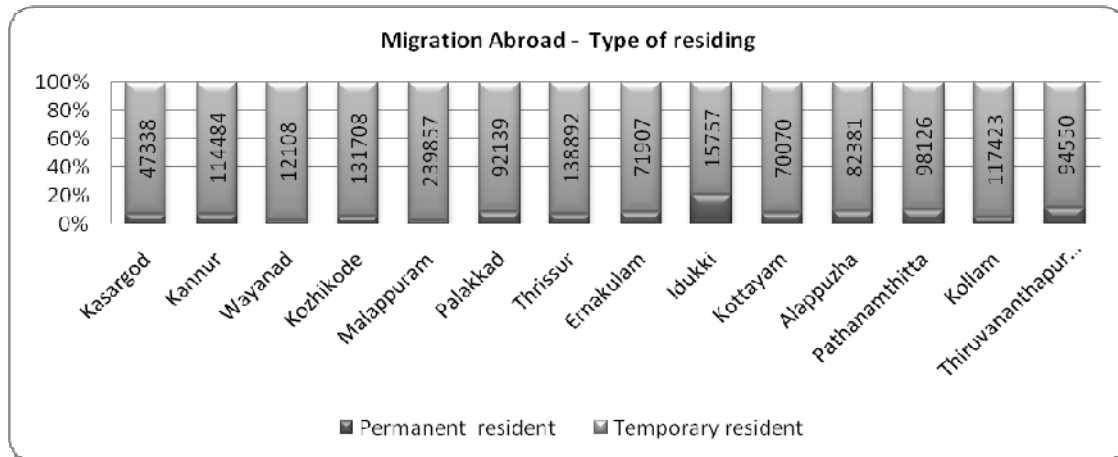

2.7 Among the migrants abroad, 33% belong to the Hindu community and 43% belong to the Muslim community. The share of Christian community is 23%. See Table-9.

2.8 As per the survey, 21.36% of the migrants abroad are Unmarried Males while 3.98% are Unmarried females. 66.56% of them are married

males and 7.85%, married females. The detailed district wise data is presented in Table-11.

2.9 Among the migrants abroad, percentage of temporary residents were found as 93.13 % and that of permanent residents 6.87%. It is not so strange but a fact that the migrants to other countries never make the migrated country as their permanent residing nation. Among the

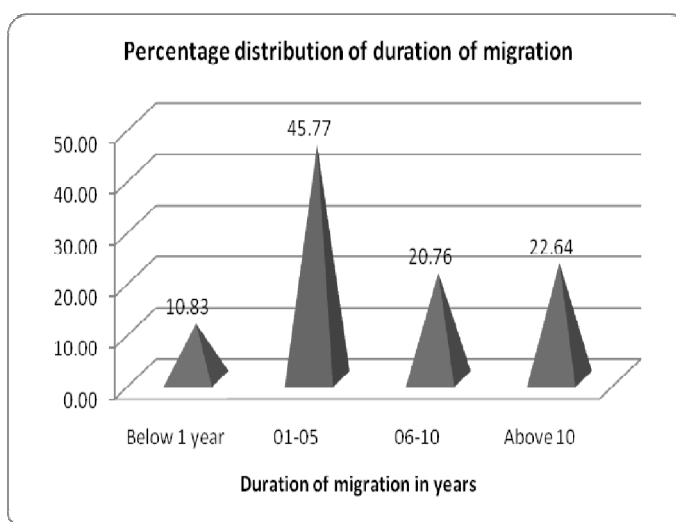

permanent residents abroad, maximum percentage of contribution is from Thiruvananthapuram (12.44%), Pathanamthitta (11.25%) and Thrissur (10.53%). The ratio of Permanent residents to Temporary residents was found as 20:80 in Idukki and 2:98 in Malappuram. This is strongly supported by the findings that in Idukki, out of the total out-migrants, 12.85% of them possess citizenship of other countries and only 0.14% of the migrants from Malappuram have citizenship in other countries. See Table-13.

2.10 In the case of citizenship of the migrants, 1.92% of them have citizenship in other countries also and 95.79% of them have citizenship only in India. It is also observed that the informants are unaware of the case of citizenship of the other 2.29% of the migrants. As stated in the previous paragraph, in Idukki, out of the total out-migrants, 12.85% possess citizenship in other countries followed by Kottayam with 6.55%. See Table-14.

2.11 As per the survey results, 62% of the migrants abroad are working in the private firms and 3.21% in Govt/Semi Govt firms.

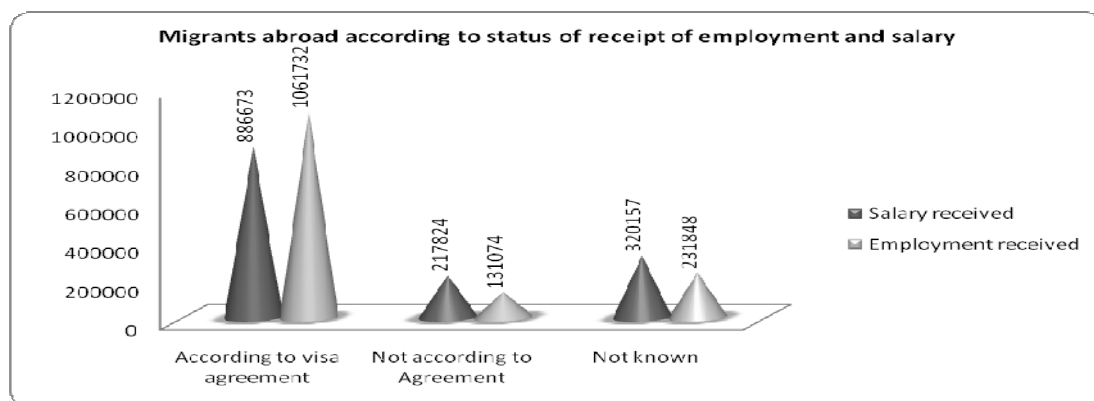

2.12 Getting an employment in overseas is a very difficult task. There are so many agencies and private individuals who offer employment to the migrants in abroad. There are people, who manage to get a job abroad with their own efforts. The survey result shows that around 12% of them got their employment through their own efforts. 45.22% of them got their job through private individuals and 24% got through different agencies. 72% of them got their employment in private institutions and 3.02% got Government jobs. 25% are employed in other institutions. See Table-16 for details.

2.13 The survey results show that 45.77% of the migrants fall in the one to five years of the duration of migration group and 22.64% falls in the period of more than 10 years group. Only 10.83% of them are in the group of less than one year. The

The detailed data are shown in Table-17. Details of number of migrated abroad according to last year of migration is shown in the Table-18.

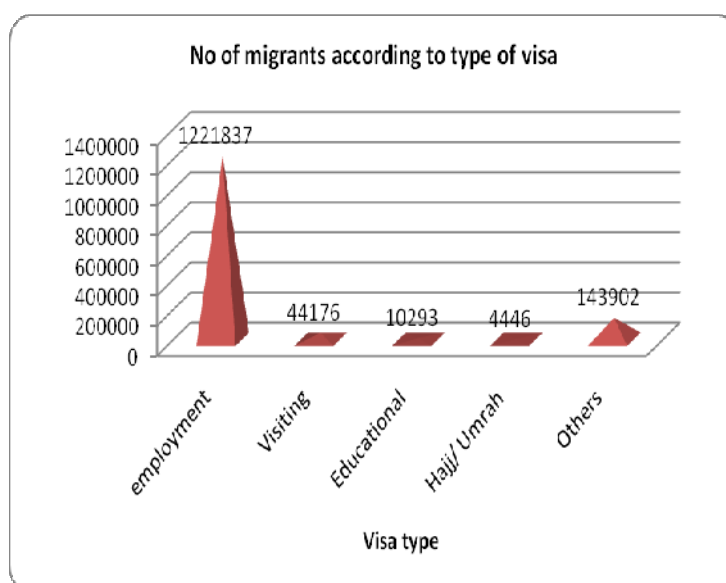

2.14 74.53% of the migrants got their job abroad as per their visa agreement whereas 9.20% of them couldn't get job as per their visa

agreement. The informants couldn't reveal the fact in the case of 16.27%. In the case of receipt of salary, 62.24% of the migrants received their salaries as per their visa agreement while 15.29% of them were not paid as per their visa agreement. In this case also, 22.47% of the informants couldn't report the factual position. Table-19 and 20 give a detailed district wise data in these regards.

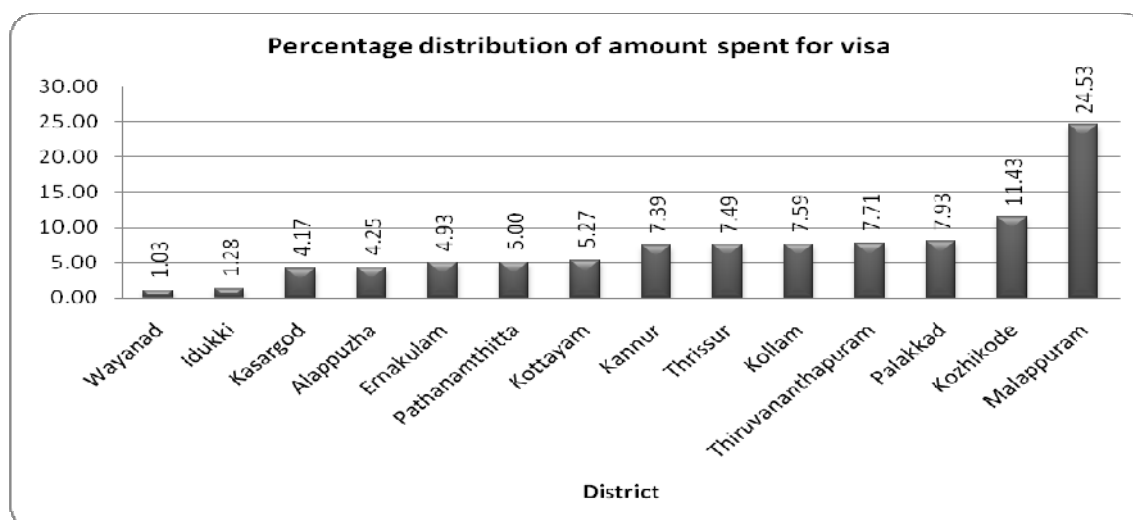

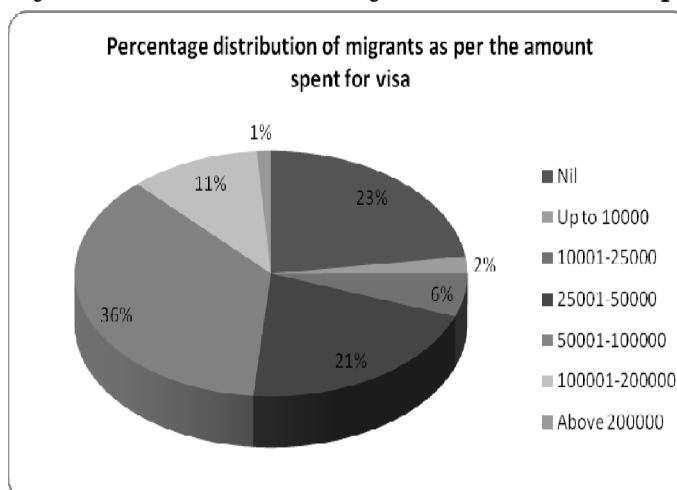

2.15 At an average 16% of the overseas migrants have the provision for staying with family in the migrated country, while 68% do not have the provision. The real status in this case is not known to 16% of the informants. The survey results reveal that the migrants from Malappuram have the least number of persons (7.03%) who have the provision for accommodating their families with them. Details of district wise numbers of migrants abroad having provision for accommodating family overseas is shown in the Table-21.

2.16 It is observed that 85.76% of the out-migrants were having employment visa while 3.10% of them were on a visit visa. 0.72% of the migrants were found to be having a visa for educational purpose and a meager 0.31% of the migrants

possess a visa for Hajj/ Umrah. Among those who possess a visa for education, Pathanamthitta tops the group with 25.91% followed by Kottayam (18.12%). See Table-22.

2.17 There are a number of visa options available in different countries for people with recognised skills seeking to work abroad. It is a fact that the people are ready to pay any amount for a better job visa. An attempt was made to fetch the amount spend for procuring the visa. Also, the number of migrants in each district were split into 7 groups as per the amount spent for procuring visa viz., NIL, Upto 10,000, 10,001 to 25,000, 25,001 to 50,000, 50,001 to 1,00,000, 1,00,001 to 2,00,000 and above 2,00,000. Out of these, 36.59% of the total migrants got their visa by paying money in the range of 50,001 to 1,00,000 rupees. 22.76% of them did not pay anything for their visa while 1.17% of them had to spend more than 2 lakh rupees for their visa.

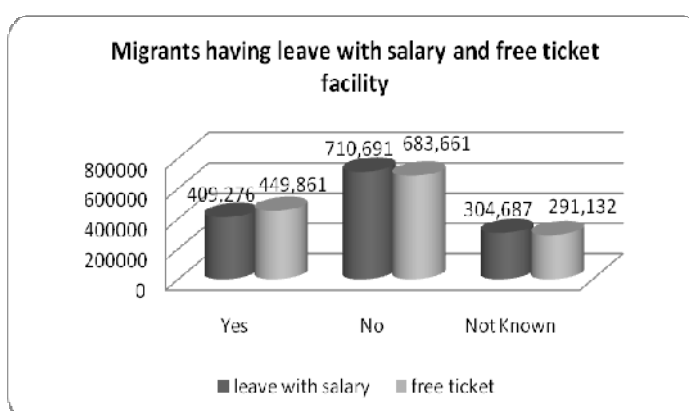

It was also surprising that the estimated amount spent on procuring the visa amount to Rs.8858.47 crore. Out of this, Malappuram alone contributed 24.53% followed by Kozhikkode with 11.43%. See Table-23.

2.18 There have always been some cases of visa cheating and forgery along with the process of migration and defrauding migrant labourers of lakhs of rupees by promising them lucrative employment in the Gulf. The survey reveals that 13 persons out of 1000 were victims of visa cheating/forgery once and 9 out of 1000 were victims twice while 977 out of 1000 never trapped in such cases. The victims of visa cheating/forgery lost an estimated amount of Rs.136 Crores. Out of this, Malappuram alone contributed 20.80% followed by Kozhikkode with 14.27%. See Tables 25 & 26.

2.19 Information also collected about the level of satisfaction on the performance of the embassy. Mixed responses were obtained on this from the informants. 40% of the informants rated the performance as average while 40% recorded 'No Comments' and 3.86% rates as bad.

2.20 It is seen nowadays that a number of institutions are offering different technical/job oriented courses for those who wish to go overseas for jobs with a better salary. Information was also collected on whether the migrants attended any such courses or got special training for the said purpose. The survey reveals that only 9.86% of the migrants attained training, out of which 0.98% of them were attained training offered by government and 8.86% of them attained training from private sector. The district wise data are shown in the Table-28.

2.21 Many of the institutions offer leave with salary to their employees and most of them offer return tickets to home-country to their employees. 28.73% of the migrants enjoy the privilege of leave

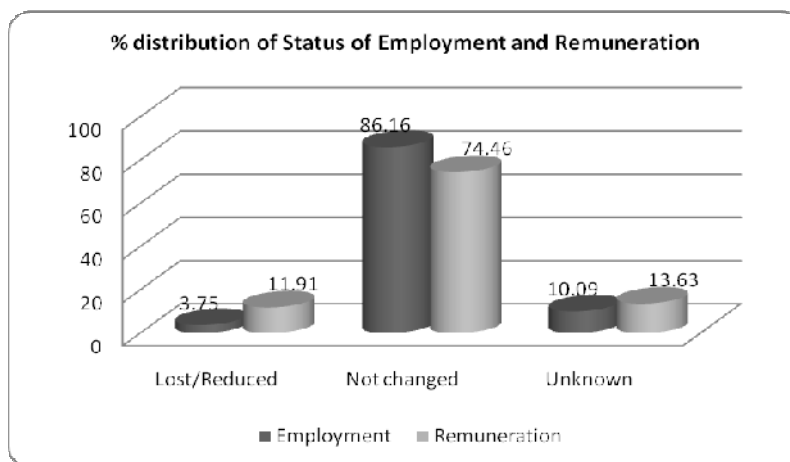

with salary while 49.89% not. 21.39% of the informants were unaware of

this. In the case of availability of free ticket to visit home country, 31.58% of them get the privilege while 47.99% do not. In this case also 20.44% of the informants couldn't reveal the details due to unawareness. For detailed data, refer Tables 29 & 30.

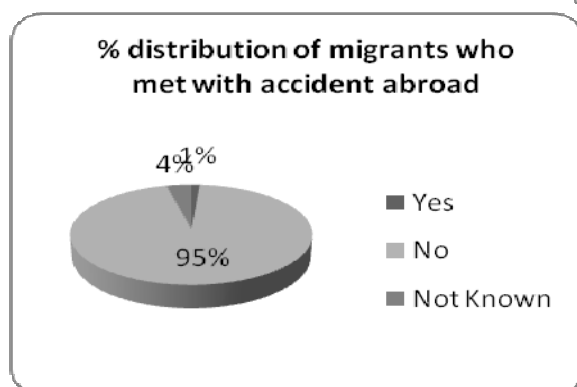

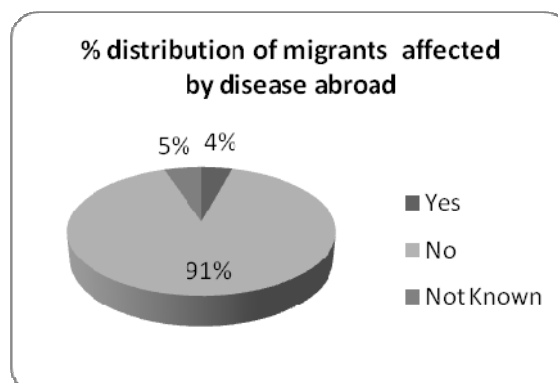

2.22 2008 financial crisis, is considered by many economists to be the worst financial crisis since the Great Depression of the 1930s. It resulted in the threat of total collapse of large financial institutions, the bailout of banks by national governments, and downturns in stock markets around the world. The survey tried to fetch information on how much the global financial crisis affected the migrants from Kerala by collecting the information on loss of employment and remuneration status after 31.12.2008.

2.23 During the period of economic recession in 2008-09, many of the people working in the private sector lost their job and for many of them, remuneration reduced marginally. 3.75% of the migrants lost their job while for 11.91% of them, remuneration decreased marginally. 10.09% of the informants were unaware of the loss of job and 13.63% of them were unaware of the remuneration status. District-wise data are included in the Table-31.

2.24 In the case of mode of transfer of money by the migrants, 77.74% of them trusted bank as the medium of money transfer. 9.33% of them trusted different agencies and private firms. Only 1% of them used Govt modes for transfer. See Table-32.

2.25 Illness, injuries and accidents abroad are always a matter of serious concern to migrants as well as their families. As per the survey, 91% of the informants reported there were no cases of diseases reported by the

migrants and 4% reported some cases of diseases. 5% of the informants are unaware or couldn't report any such cases. In the case of accidents abroad, 95% of the informants were sure

that there were no cases for their kin, while 1.25% reported that the migrants from their family met with accidents abroad. In this case also there were 3.72% of the informants who were either unaware or unknown about any such incidents. See table 33 for district wise details.

2.26 Foreign convictions and imprisonments are other serious matter for concern. The survey results reveal that only 0.29% of the migrants were convicted abroad and 0.20% got imprisonment abroad. Also 0.07% of the migrants are in jail during the period of the survey. As stated above, in this case also, around 3% of the informants were unknown about the factual situation.

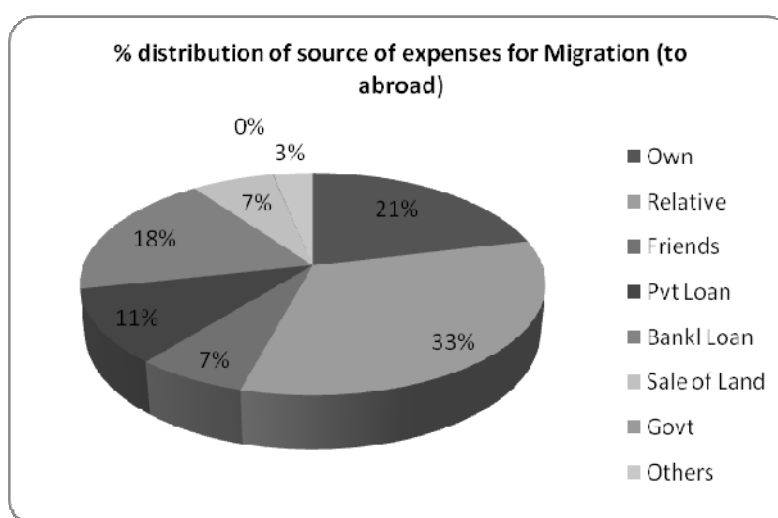

2.27 Out of the total migrants, an estimated number of 5555 were found absconding abroad. The male to female ratio of this is 92:8. Detailed data included in the Table-35.

2.28 Different Pravasi Suraksha Schemes are available in the State which offers savings for return and resettlement, old age and to obtain a

Life Insurance cover against natural death during the period of coverage. As per the survey findings, 952 out of 1000 migrants have not received any concessions from any of such schemes. However, 20 per thousand migrants got the concessions from the NRI welfare fund and 15 per thousand migrants have the NRI ID card. Persons got relief from the schemes like Santhwanam, Karunya, Insurance and Kuwait relief were very less. District-wise data are shown in the Table-36.

2.29 Out of the total expenses incurred on migration, 32.96% of the

amount was the contribution of relatives and 18.40% were through bank loans. Only 21.29% of the amount were own contribution. 6.70% of them traced the amount by sale of

land 6.64% of the migrants were helped by their friends. The detailed data is given in Table-37.

2.30 Most of the families of migrated people are depending on the money received from abroad for their expenses. An attempt was made to collect the details of spending of the money received from abroad in priority basis. Spending of money has been split into 7 categories viz Daily expensesenses, education, debt payment, marriage, treatments, savings and others. Expenses on foreign income according to priority are given in Tables 38 to 44.

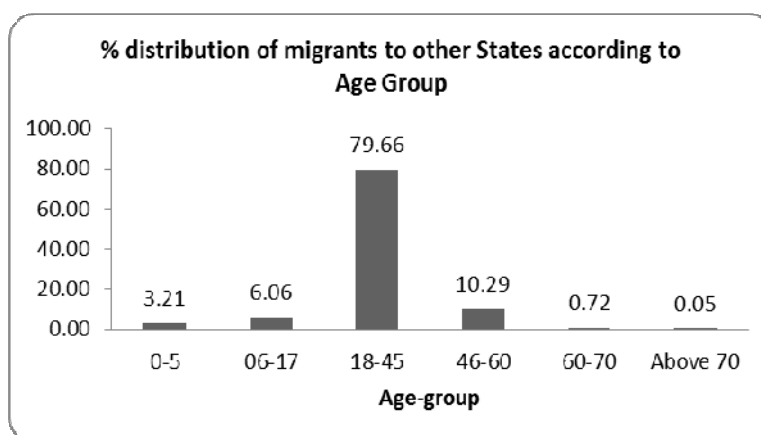

Chapter 3

Migration to other States

3.1 Migration has been a significant factor in helping reduce poverty, unemployment and relative deprivation in Kerala. The general atmosphere in Kerala favours out migration. The main purpose of getting educated is to get secured in life whether within Kerala or somewhere outside Kerala to live peacefully and comfortably. To some extent this peace and comfort are achievable for those who migrate to other states in India or abroad.

3.2 It is estimated that 3,40,936 people were migrated to other states while 21,234 were returned from other states. The number of persons immigrated from other states were estimated at 41,948. (Table-2)

3.3 The survey result shows that people from Kerala migrated to almost all states in India and that the maximum number of people migrated was to Karnataka (26%) and to Tamil Nadu (22%). Maharashtra stood at the third place with 17%. The percentage of the number of people from Kerala migrated to North-East states like Arunachal Pradesh, Sikkim, Missoram etc. are very less. For detailed District wise and state wise data refer Table-45.

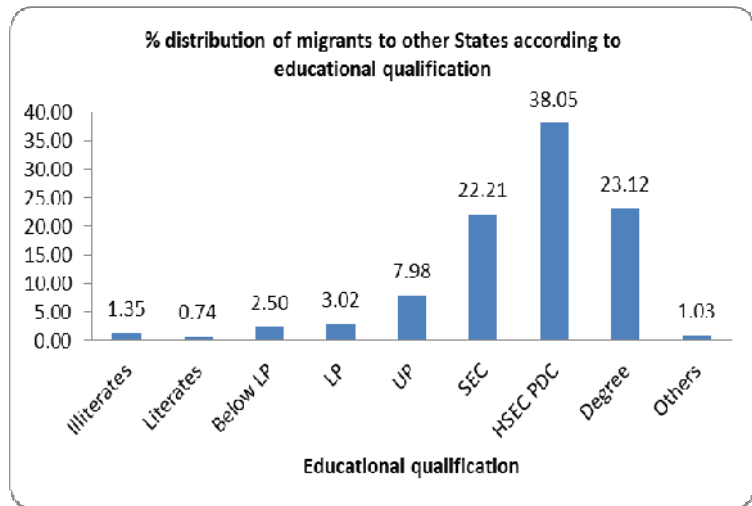

3.4 The survey results show that, among those who migrated to other states, 79.66% of them fall in the age group of 18-45 and among the age group 18-45, 13.34% of them were from Palakkad. It is also seen that less than only 1% of them were among the age group of 60-70 and above 70. This may be the dependent parents

of the real migrants. The detailed district-wise age-wise data are given in Table-46.

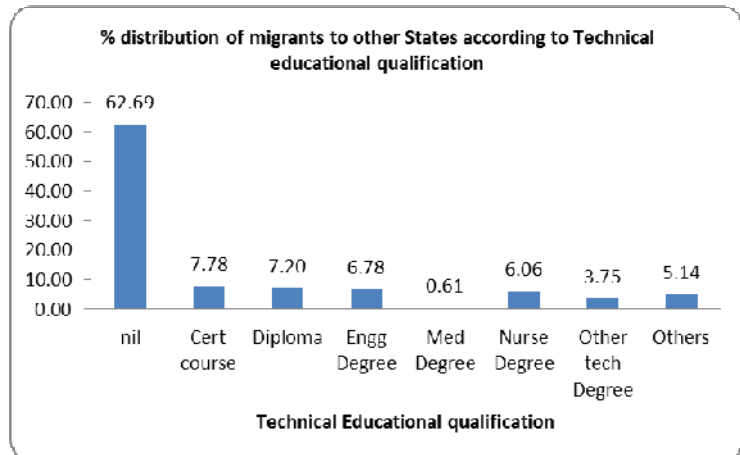

3.5 Out of total migrants, the male to female ratio is found at 71:29. In the case of Malappuram, the observed ratio is 87:13 whereas in case of Kottayam, the ratio is found as 49:51. This can be supported by the fact that among the nursing degree holders, Kottayam tops the group with 29.24% (Table-49). The district wise data is given in Table-47.

3.6 It is generally accepted that the literacy level of Kerala is high. An estimate was made about the literacy level of the migrated population excluding the kids below 6 years. It is seen that 1.35% are illiterates and 0.74% are literates (without formal schooling). While considering the educational qualification of the migrants, the survey result shows that maximum number of the migrants to other states were Predegree/Higher secondary (under graduates) holders. In case of Thrissur district, it is Degree & PG holders and in case of Malappuram it is Upper Primary holders. In general, it is estimated that the percentage of migrants who are Lower Primary and below are 5% or less. The detailed data are shown in Table-48.

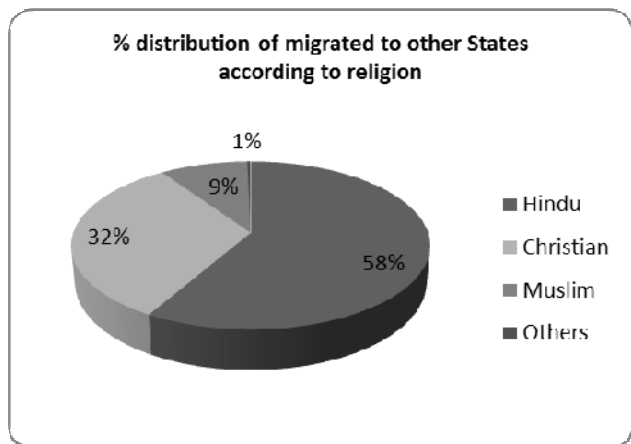

3.7 While considering the technical educational qualification of the migrants, the survey result shows that maximum number of the migrants to other states was not having any technical qualification. The State level average of percentage of technically not qualified migrants is found as 63%. The medical degree holders were found to be the least (0.60%) where as engineering degree holders and diploma holders constitute 13%. Though the

state level average percentage of migrants having an engineering degree is 6.78%, the districts of

Thiruvananthapuram, Ernakulam and Kozhikkod constituted 18.54%, 11.96% and 11.69%. Among the districts, 18.45% from Idukki, 18.16% from Kottayam and 11.77% from Wayanad were nursing degree holders while the State average stood at 6.06%. The detailed data are shown in Table-49.

3.8 On examining the religion wise break up of migrants to other states, it is seen that 58% of the migrants in other states belong to Hindu religion followed by Christian, where it is 32%. Considering the same on district wise, 89% of the migrants from Palakkad to other states belong to Hindu religion and in case of Kottayam district, 65% belong to the Christian religion.

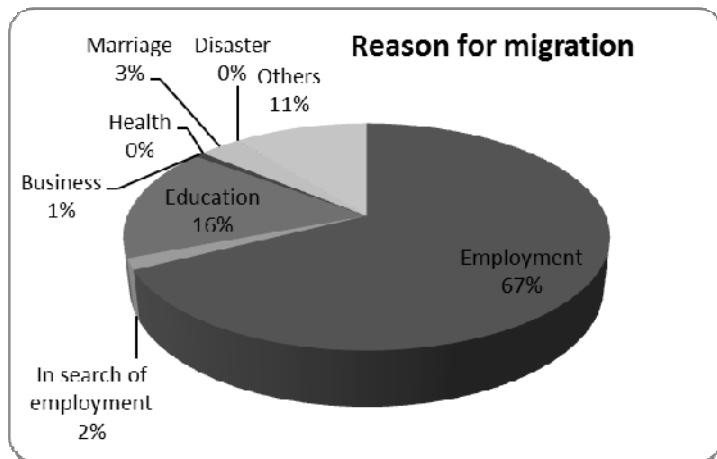

In Malappuram 52% of the migrants to other states belong to the Muslim community. (See Table – 50).

3.9 If we consider the same on category wise, 2.66% of the migrants to other states belong to the Scheduled Caste category and 0.45% belongs to Scheduled Tribe category. 96.89% is the contribution of others. See Table-51.

3.10 The marital status of the migrants to other states shows that 52% of the migrants to other states are married and 47.76% unmarried. See Table-52.

3.11 The survey also studied the reasons for the migration of people to other states.

The state level percentages obtained are shown here. The result shows that around 67% of them migrated to other states for the purpose of employment 16% of them for the purpose of education. 3% of them had to migrate

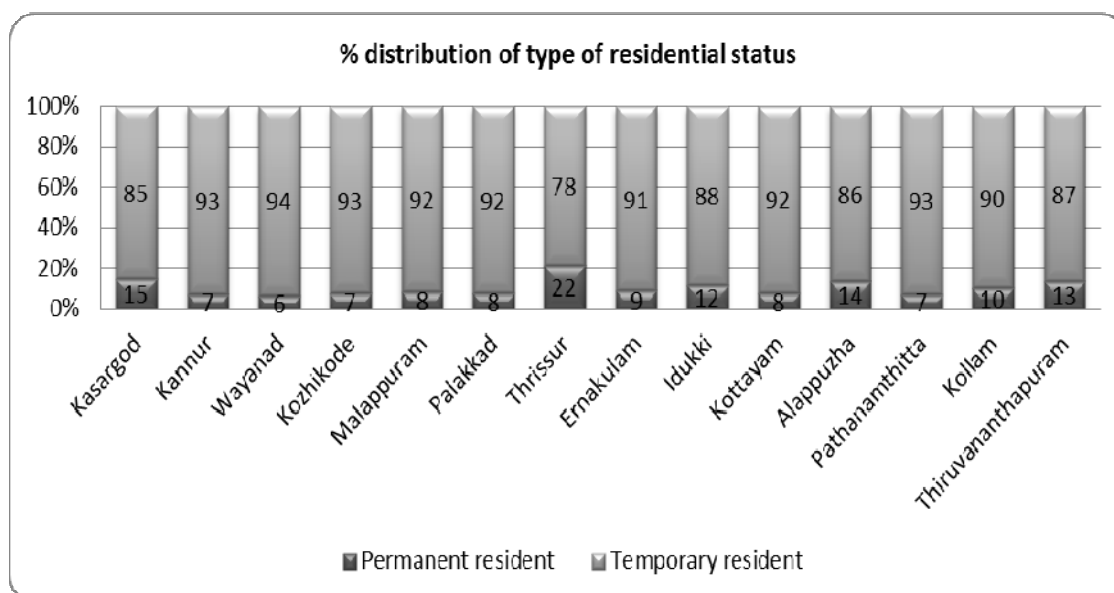

due to marriages and below 1% of them for the purpose of doing business. See Table 53 for detailed district wise data.

3.12 Out of those who migrated for employment, 15.78% of them were from Palakkad and 1.46% from Wayanad. Out of those who migrated in search of employment, Thrissur tops with 18.39% followed by Kasaragod with 12.75%. Least was from Idukki with only 1.43%. In the case of educational purpose, 20.14% of them were from Kottayam and only 1.59% of them were from Malappuram. Among those who migrated for business, 18.34% of them were from Palakkad followed by Thiruvananthapuram with 15.26%. Only 0.92% of them were from Wayanad. Thrissur recorded 18.30% and topped in the category of migration due to marriage followed by Palakkad with 15.32% whereas Malppuram and Idukki recorded 1% or less. It is also interestingly noted that, from hilly areas, persons migrated to other states are mainly for employment and education, which holds a fair percentage. The detailed data are shown in Table-53.

3.13 It is generally seen that among the migrants to other States, temporary residents were found to be more than 85% except in Thrissur, where it is 78.32%. The ratio of Permanent residents to

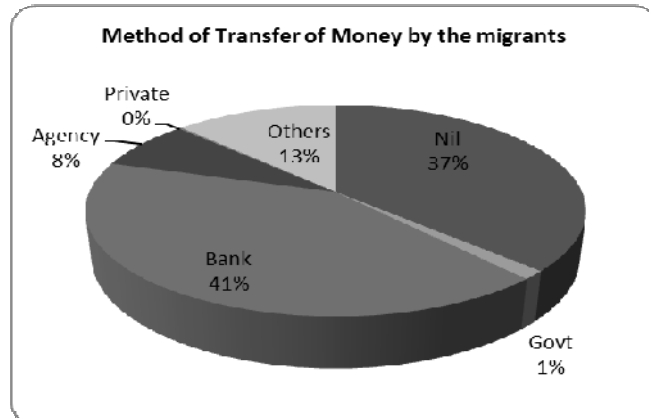

Temporary residents were found to be maximum in Thrissur district (22:78) and the minimum in Wayanad district (6:94)

whereas the State average stood at 10:90. The detailed data are shown in Table-54.

- 3.14 Out of those who migrated to other states, 43.68% of them are working in the private sector. 15.39% of them were students, 11.98% of them were working in the Govt/Semi Govt organizations and 2.46% of them were engaged in Business and Trade activities. Also, it is noted that 12.51% were included in the unable to work category. The detailed data are shown in Table-55.
- 3.15 Those who migrated to other states and employed there got their job through different modes and employed in different institutions. Around 33% of them got their employment through their own efforts. 21% of them got their job through private individuals and only 8% got through Government. 50% of them got their employment in private firms and 12% got Government jobs. 38% are employed in other institutions. See Table-56 for details.
- 3.16 Duration of migration of 58% of the migrants to other states are below 5 years and 23% of them are above 10 years.

3.17 An attempt was made to fetch the information on the method of transfer of money by the migrants to the state. It is observed that a maximum of 41.44% of them send money through banks and only 8% through agencies and only 1% through the Govt. 36.93 % of them don't send money to the State. Among those who send money through banks, Alleppy tops with 13% and among those who never sends money, Palakkad tops with 13.09% followed by Pathanamthitta with 12.53% and least being Kasaragod with 1.57%. See Table-60.

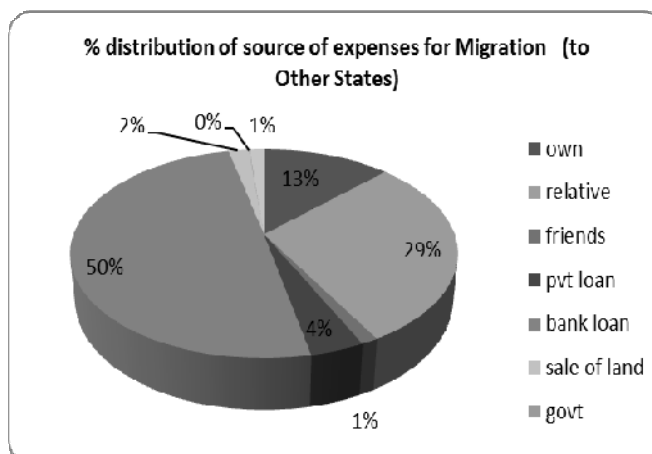

8% through agencies and 1% through the Govt. 36.93 % of them don't send money to the State. Among those who send money through banks, Alleppy tops with 13% and among those who never sends money, Palakkad tops with 13.09% followed by Pathanamthitta with 12.53% and least being Kasaragod with 1.57%. See Table-60.

3.18 The survey results show that less than 1% of the migrants to other States lost their employment due to the financial crisis whereas 39% of the informants said "NO". 60% of the informants could not tell the factual situation due to ignorance. Same was the case with remuneration status of the migrants. 1.18% of the informants told that the remuneration of their kin reduced due to financial crisis whereas 38% said "NO". Here also 61% of the informants couldn't tell the factual situation. A correct picture couldn't be traced from the survey due to the informant's approach. See Tables 58 & 59.

3.19 In the case of migrants to other states who are convicted and got imprisonment in the respective migrated states, there were only 0.02% of them who are convicted and 0.01% got imprisonment there. There were no cases of migrants to other states who are in prison during the period of the survey.

3.20 Out of the total number of migrants, 26 per 10,000 are absconding in other states. In terms of gender-wise, it is 27 per 10,000 males and 23 per 10,000 females. The details are shown in Table 63.

3.21 Out of the total amount incurred on migration, 49.73% of the amount was taken as bank loan and 29% was contributed by the relatives of the migrants. Only 12.71% of the amount were own

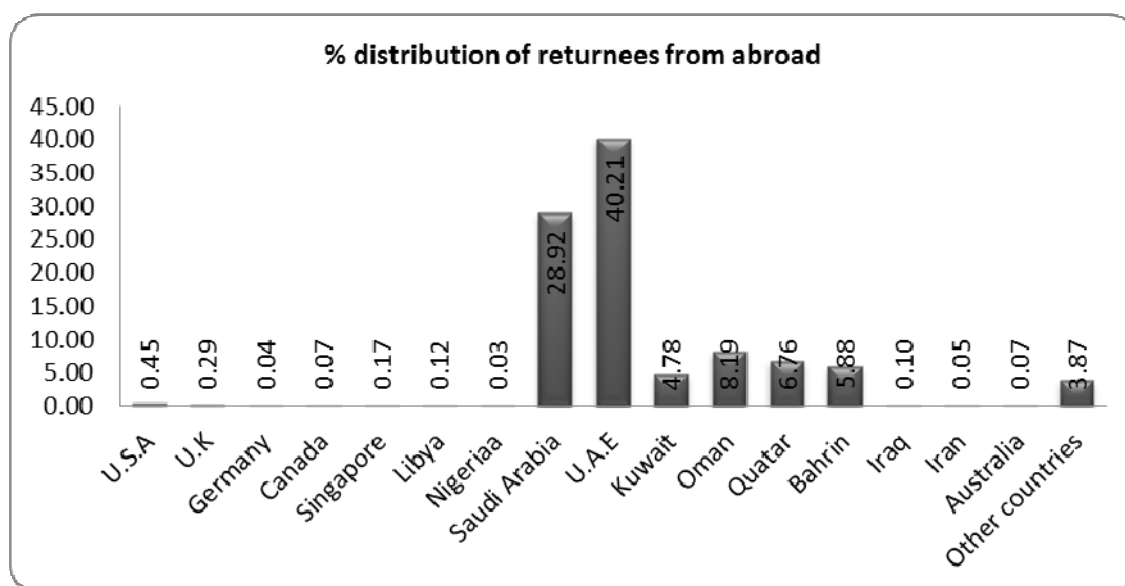

contribution. The detailed data are given in Table-64.

Chapter 4

Return Migration from Other Countries during the last 5 years

4.1 A return migration is a particular case of re-emigration, one in which the new country of destination is the same as the country of origin and is an integral part of the initial migration plan. For many migrants, returning home is a prospect they cherish and one that sustains them during their migration history. Though, there are many problems involved and/or lead to the return migration of many people.

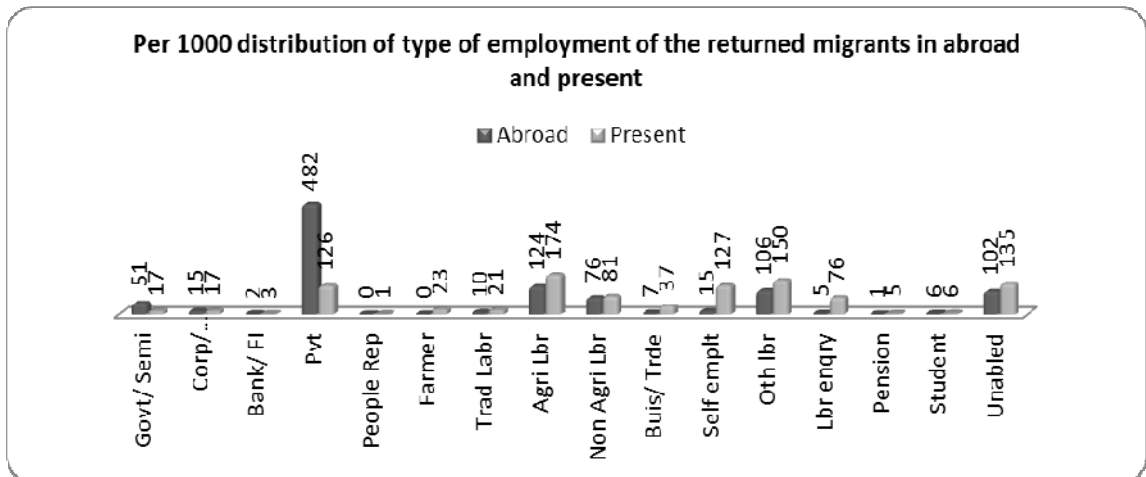

4.2 While considering the number of return migrants from abroad, it is observed that 40.21% of them were from U.A.E followed by Saudi Arabia with 28.92%. The least were from Nigeria (0.03%), Germany (0.03%) and Iran (0.05%). The maximum number of return migrants in Kozhikkod, Malppuram and

Palakkad were from Saudi Arabia and in case of all other districts, it was from U.A.E. Out of those who returned from U.S.A and U.K, the maximum are belong to Kottayam. (See Table -65). The average Male to Female ratio of return migrants from abroad was found at

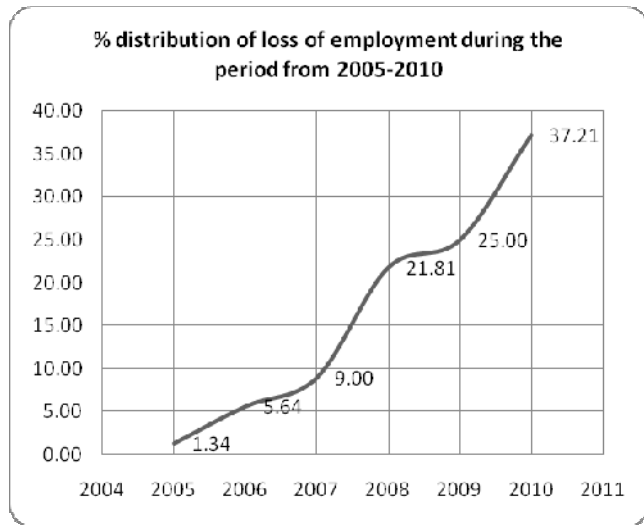

95:5. In Kasaragod, the ratio was found at 99:1 and in Idukki 76:24. (See Table-67)

- 4.3 43.74% of the return migrants possess Secondary education and 7% of them possess graduation. In case of technical education, 80% of the return migrants from abroad were not having any technical education whereas 9% of them were having certificate courses and 4% of them were diploma holders. District wise data are shown in Tables 68 & 69.
- 4.4 An average of 38.52% of the return migrants belong to Hindu religion, 17.39 belong to Christianity and 43.92% of them belong to Muslim religion. Percentage of return migrants from abroad belong to the Christian religion is less than 3% in Kasaragod, Malappuram and Palakkad. (See Table-70). The district wise details of the number of return migrants from abroad belong to different social groups are also presented in Table-71.
- 4.5 14% of the return migrants from abroad are unmarried men and 81% are married men. 4% of them are married females. See Table 72. 48.18% of the return migrants were working in the private sector abroad, while 5.11% of them were Govt/Semi Govt

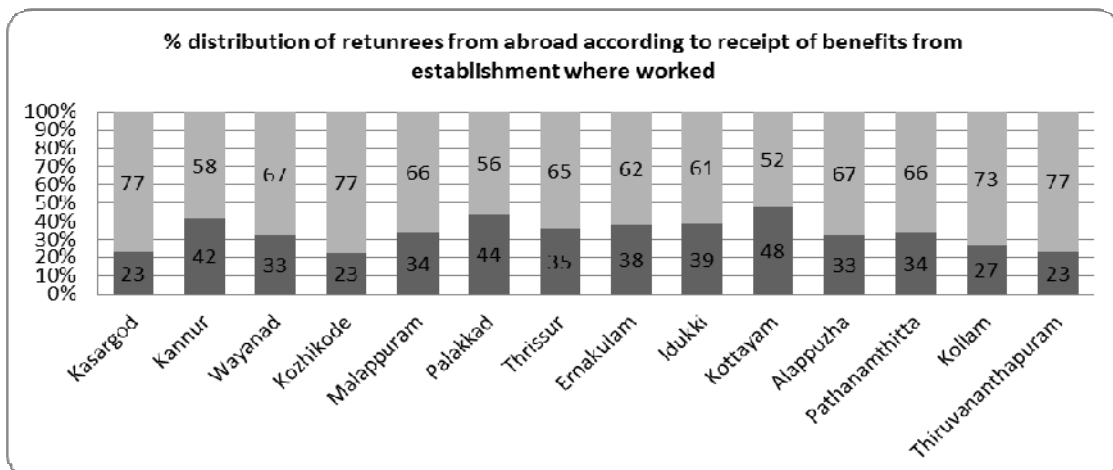

employees. See Tables 73 & 74. A comparative study of the employment types while abroad and after return to home country is presented in the chart below.

4.6 Loss of employment is the reason for 43.59% of the migrants to return back to own country. 14.54% of them returned back due to health problems. The percentage distribution of loss of employment during the period from 2005 to 2010 is given in the chart. For detailed district wise data see Tables 76&77.

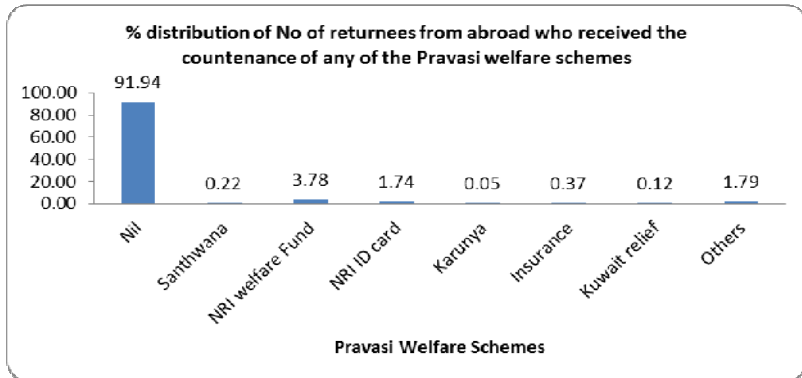

4.7 In the case of receipt of all kinds of benefits from the establishments while returning from abroad, survey results show that, in the State level, only an average 32% of the return migrants received all the benefits offered by the employers while joining the establishments. It is shocking to know that 68% of the migrants did not receive the benefits while returning to home country as offered by the employers. In the case of Kottayam, the

ratio of receipt to non-receipt was found at 48:52. In the case of Thiruvananthapuram, Kozhikkode and Kasaragode, the said ratio stood at 23:77. See Table-78.

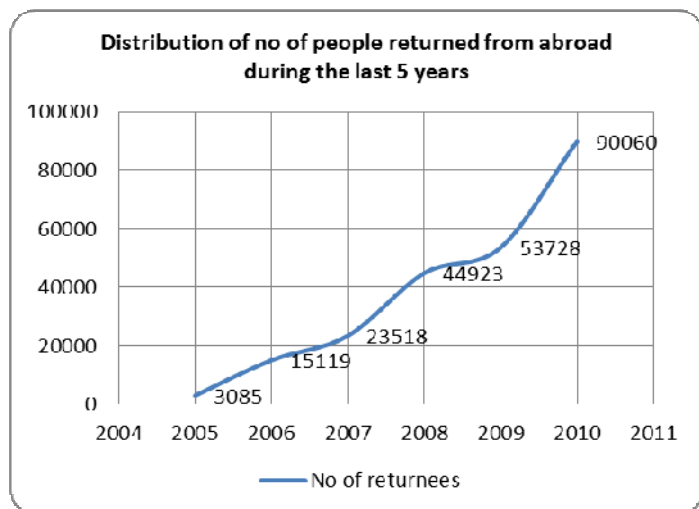

4.8 In the case of citizenship of return migrants from abroad, an average of 4 per 1000 return migrants possess citizenship in other countries. In the case of Kottayam district, it is 18 out of 1000.

4.9 An attempt was made to grab the information on whether the return migrants from abroad received the countenance of any of the Pravasi welfare schemes.

The survey results show that around 92% of the return migrants didn't receive the countenance of any of the Pravasi welfare schemes. It can also be inferred that this is due to the ignorance about the schemes. Among the schemes, about 4% of the return migrants received the NRI welfare fund. See Table-81.

4.10 The number of return migrants from abroad during the period from 2005 to 2010 showed an upward trend. The percentage of increase in the number of return migrants in 2006 compared to the previous year 2005 was found at 390% and that in 2010 compared to 2005 was found as 2819%.

Among those returned from abroad, about 58% of them were permanent residents in abroad. The detailed data are shown in Table-82.

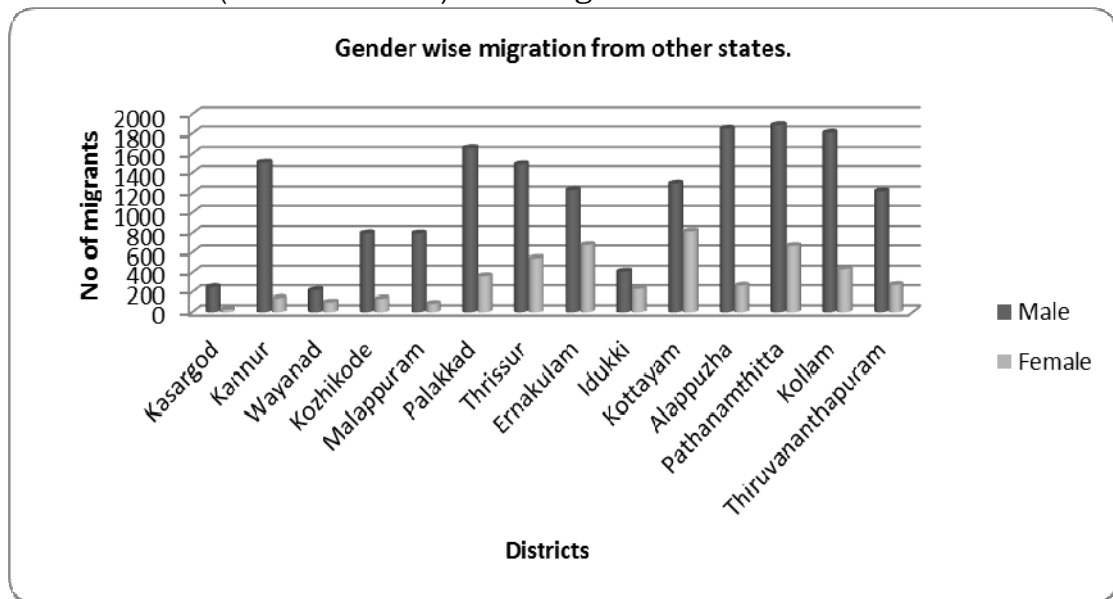

Chapter 5

Return Migration from Other States during the last 5 years

5.1 In the case of return migration from other states, it is estimated that 21,234 people returned from other states to Kerala during the past 5 years (i.e. From 2005 to 2010). The maximum number of migrants returned was from Karnataka (21%) followed by Maharashtra (17.6%). Tamil Nadu stood at the third place with 15%. See Table 84.

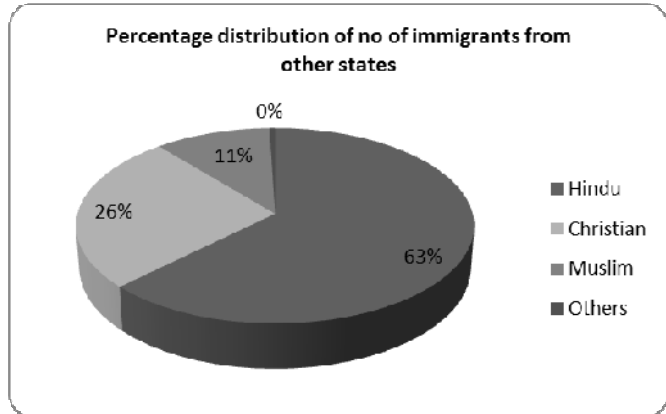

5.2 If we consider the returned migrants according to different age group wise, 60% of the returned migrants from other states belong to the age group of 18-45 followed by the age group of 46—60 which consists of 26% of them. See Table-85.

5.3 It is found that, out of total no of people returned to Kerala from other states, 77.50% of them are males and 22.50% of them are females (See table-86). Among those returned to Kerala from

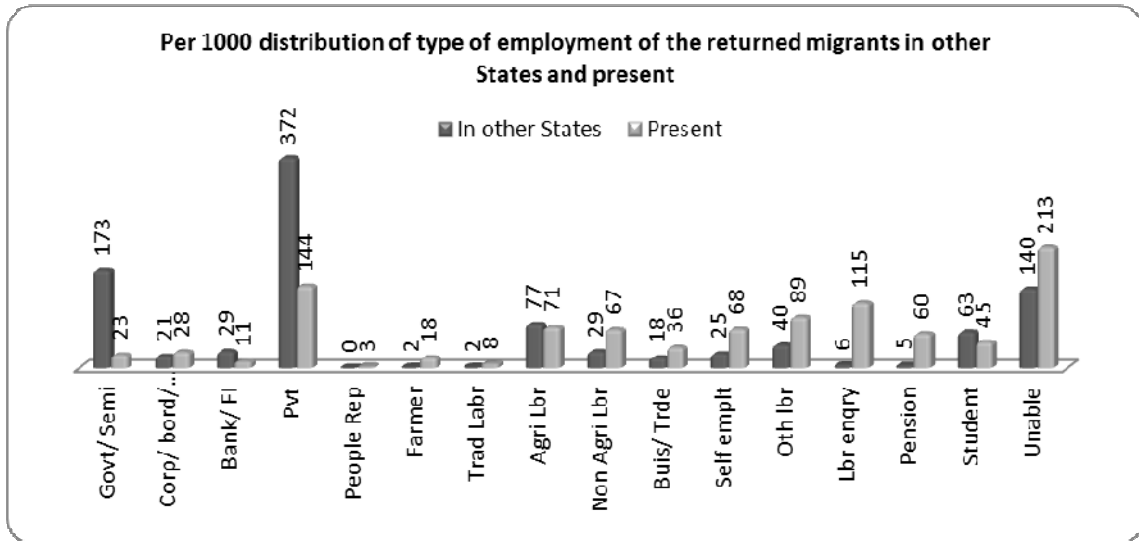

other states, 37.67% of them have general education in Secondary, 28.55% have higher secondary education and 14.82% are graduates. (See table-87). Also 66.19% of them don't have any technical education. 5.82% of them have a nursing degree and 6.70% of them have a diploma. (See table-88).

5.4 62.76% of the return migrants from other states belong to Hindu religion, 25.90% belong to Christian and 10.84% belong to Muslim. The representation from all other religion is found at 0.51%. Further, considering the social group wise data, 4.07% of the return migrants from other states to Kerala belong to SC category and 95.93% of them belong to other categories. (See tables-89 & 90).

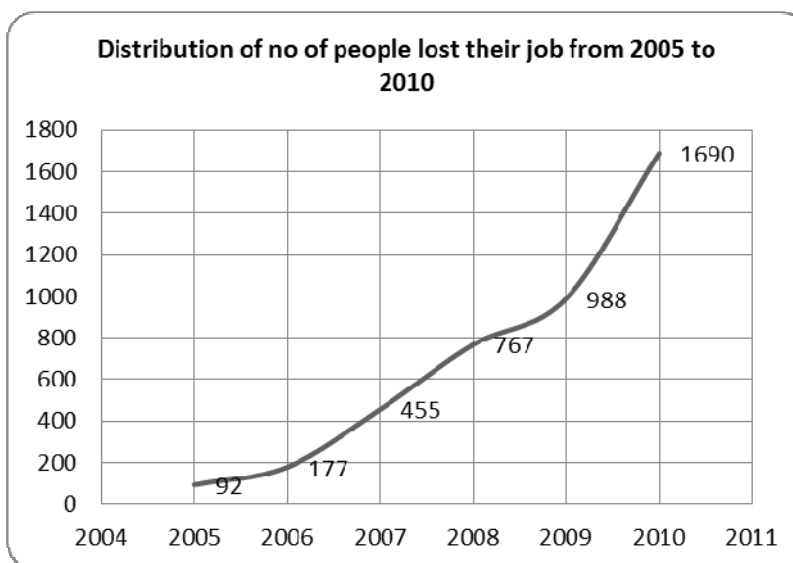

5.5 A comparative study of the employment types while in other States and after return to home State (See Tables 92 & 93) is presented in the chart below.

5.6 72.52% of the returned migrants from other states were married and 26.57% of them un-married. It is also to be noted here that 73.42% of the return migrants went to other states for employment and returned on retirement. 7% of them were migrated for education and returned on completion of the course. See table 94.

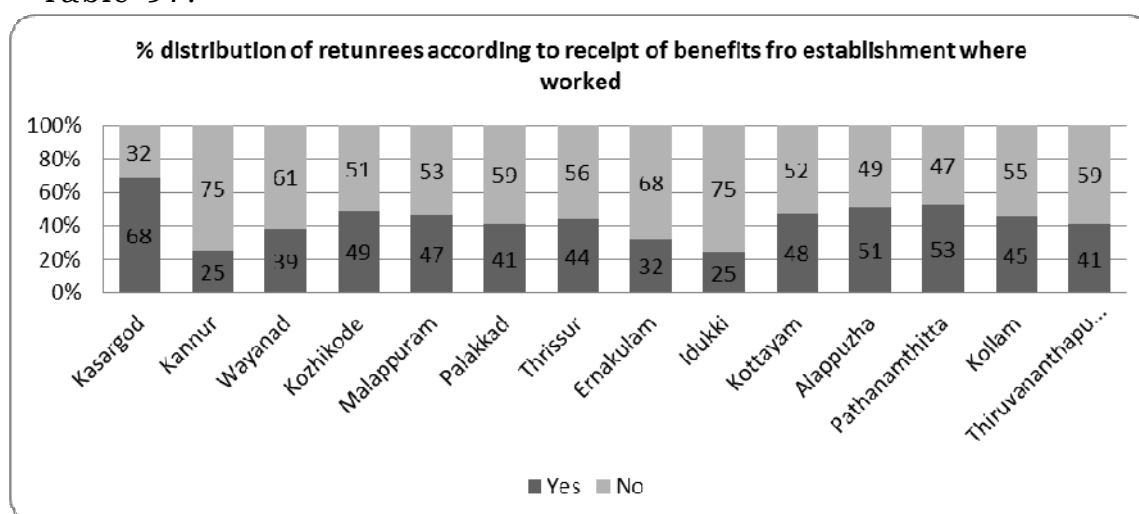

5.7 As per the results of the survey, reason for return to home state for 19.63% of them were loss of employment and for 3.27% of them getting a new job in the home state. 12.47% of them

returned due to health problems and 58.54% on various other reasons which may include on retirement and completion of education and transfer. The percentage distribution of loss of

employment during the period from 2005 to 2010 is given in the chart below. For detailed data see Tables 95 & 96.

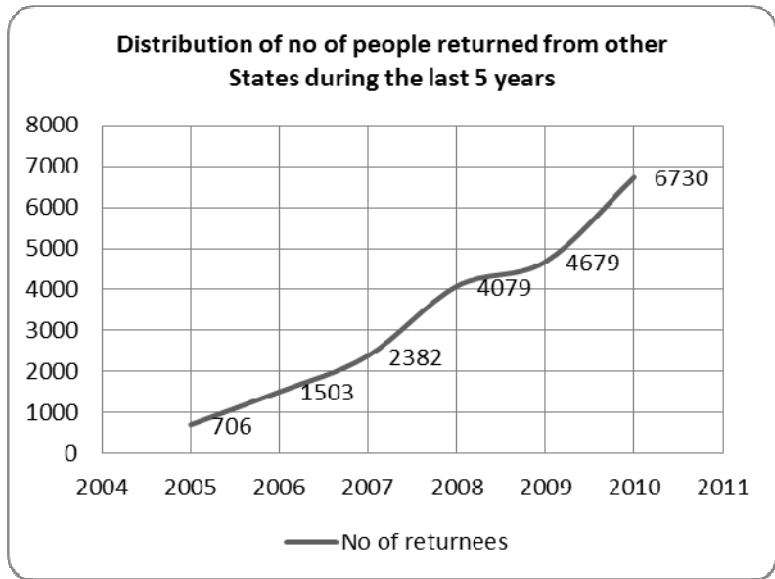

5.8 An attempt was made to fetch information on whether all kinds of benefits were received from the establishments while returning from other States. Survey results show that only an average 43% of the return migrants received all the benefits as offered while joining the establishment whereas 57% of them did not. In Idukki and Kannur the ratio is found at 25:75 and in Kasaragod the ratio was 68:32. The detailed data are shown in Table-97.

5.9 The number of return migrants from other States during the period from 2005 to 2010 showed an upward trend.

The percentage of increase in the number of return migrants in 2006 compared to the previous year 2005

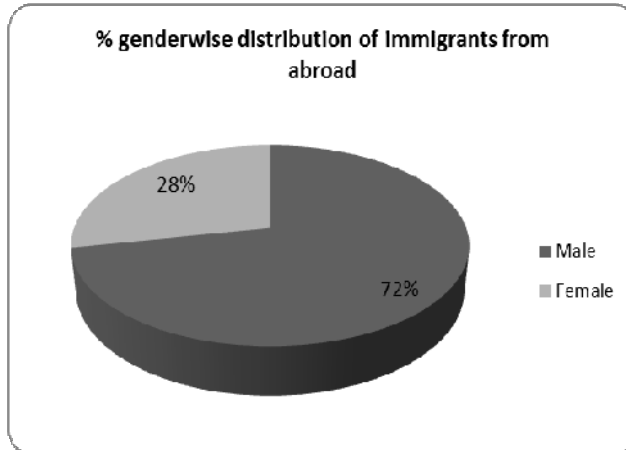

was found as 113% and that in 2010 compared to 2005 was found as 853%. It is also interesting to note that, out of these return migrants from other states, 61% of them were permanent residents in other states. The detailed data are shown in Table-99.

Chapter 6

Immigration from Other Countries

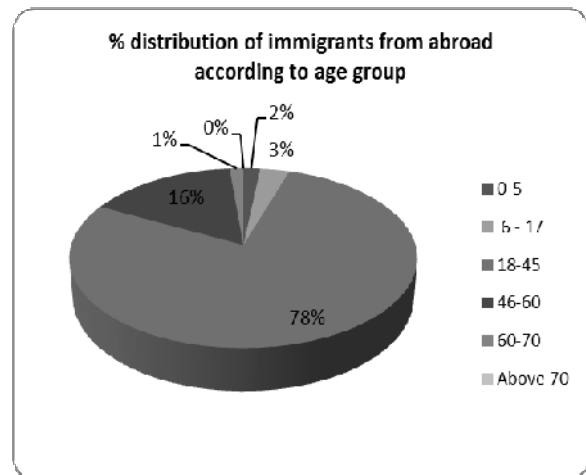

6.1 The survey results show that an estimated 1556 people from abroad immigrated to Kerala in the past. The countries from which

these people are immigrated are classified into Germany, KSA, Oman, UAE and others. Around 15% of the immigrants are from KSA and UAE. 81.75% is from other countries. (See Table-

101). Out of the immigrants from abroad, 72% are males and 28% are females.

6.2 It is also observed that the maximum immigrants from abroad belong to the age group category 18-45 years (78%) and 16% are in the age group of 46-60. There were no immigrants in the age group of above 70 category. (See Table-102).

6.3 Regarding the general education level of immigrants from abroad, 26% possess secondary education and 26% possess Upper Primary. 8% of them are graduates. 93% of the immigrants from abroad have no technical education and 1.29% of them possess engineering degree. See tables 104 & 105.

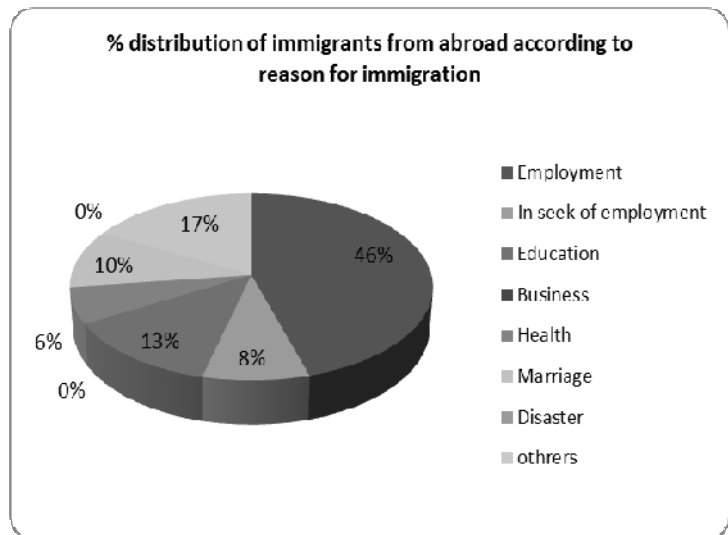

6.4 44% of the immigrants from abroad belong to the Hindu community and 31% belongs to the Muslim community. In the case of

social group, there was nobody from the Scheduled tribes and only 2% of them were in the scheduled caste group. See tables 106 & 107.

6.5 35% of the immigrants from abroad are unmarried and 64% of them are married. There were no divorcee's or separated.

6.6 While considering the duration of immigration, out of total immigrants, for 43% of them the duration is above 10 years and 37% in 1 to 5 years. And 15% below 1 year. For district wise data refer Table-112. 59% of the immigrants are permanent residents and 41% temporary.

6.7 In the case of reasons for immigration from abroad, 45.44% of them was employment and 12.79% of them were for better education. Reason for immigration of 10% of them was marriages. It is also interesting to note that 8.42% of them immigrated for seeking better employment in the

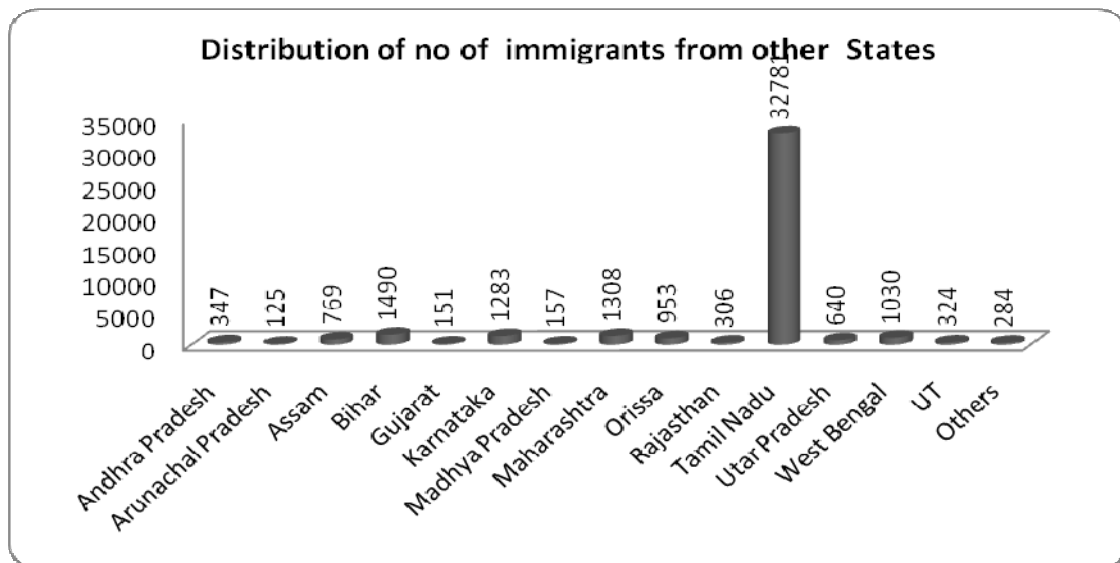

State. Refer table -110 for detailed data. Duration of immigration of around 37% of them was between 1 to 5 years and that for around 43% of them were more than 10 years (See table-112).

Chapter 7

Immigration from Other States

7.1 It is seen that a large number of people from other states immigrated to Kerala in the past belonging to different religions, social group and having different educational status. The main reason for migration is generally employment. Anyhow, many others have also immigrated for seeking employment in the state, education, business, health, immigration due to marriage, disaster and many other reasons.

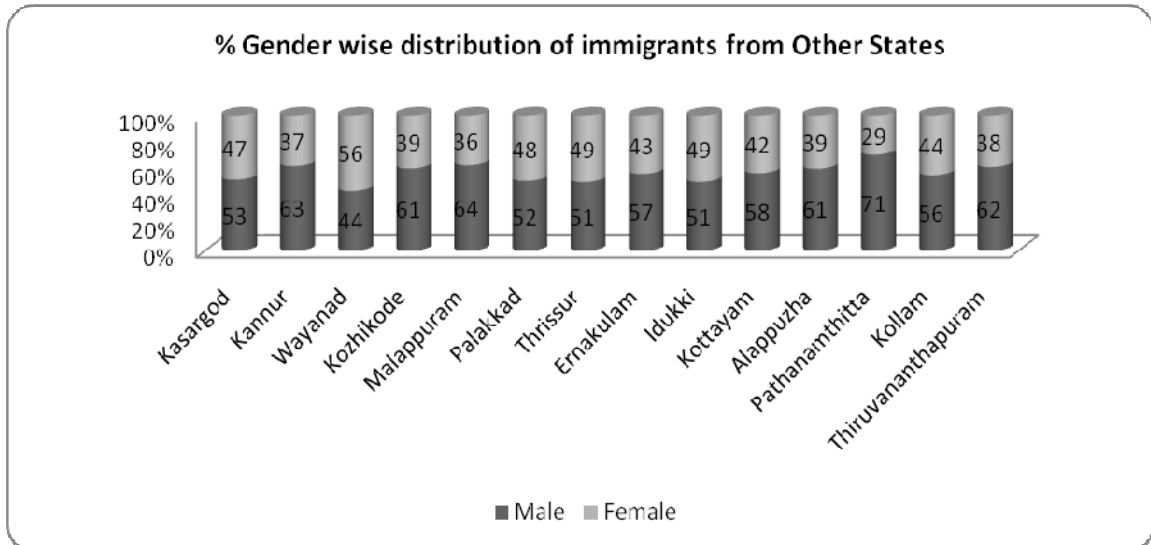

7.2 The survey estimated that, in Kerala, there are about 41,948 immigrants from other states. It is seen that maximum immigrants are from our nearest neighbouring state Tamilnadu whereas from the north and eastern states the number of immigrants are

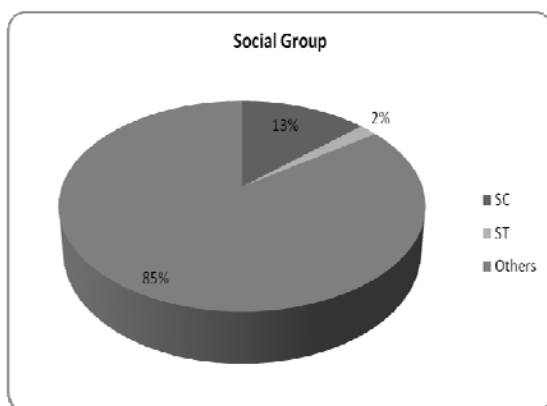

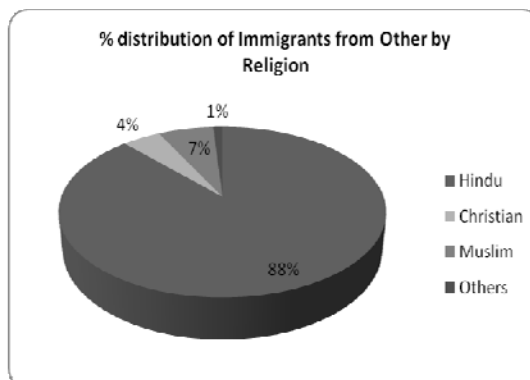

negligible. Also the maximum immigrants are in the Palakkad Districts. It is very interesting to see that in Idukki and Kottayam, almost 96% of the immigrants are from Tamilnadu whereas it is only 71% in Palakkad, the district which share maximum boundary with Tamilnadu. The survey reveals that 78.15% of the immigrants are from Tamilnadu followed by Bihar with 3.55% . Maharashtra took the third place with 3.12% followed by

Karnataka with 3.06%. District wise details can be seen at Table-114.

7.3 61.13% of the immigrants from other states belong to the age group of 18 to 45 and 14.27 in the age group of 46 to 60. Out of the total immigrants, the average male to female ratio was found at 56:44, whereas Pathanamthitta holds the ratio 71:29 and Wayanad 44:56. See tables 115 & 116.

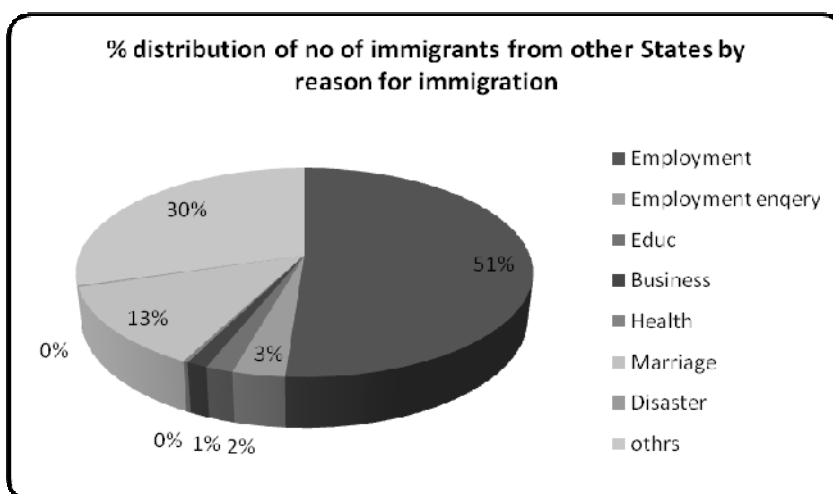

7.4 As per table-119, 88% of the immigrants are Hindus and from table-120, 8% of them belong to SC category and 2% of them belong to ST category. Regarding the general educational level, 21% of them completed Upper Primary education and 22% of them

having a Secondary education. Only 6% of them are graduates. (See table-117). Regarding technical education status, 93% of the immigrants did not have any technical education and 1% of them hold engineering degree (See Table-118).

7.5 In the case of marital status of the immigrants, 196 per 1000 of the immigrants are un-married men and 114 per thousand immigrants are un-married women. 358 per 1000 of the immigrants are married men and 314 per thousand immigrants are married women. See Table 121 for district wise data.

7.6 As stated earlier, the reason for immigration are one among employment, education, business, health, immigration due to marriage, disaster and many other reasons. The survey results show that 51% of

the people immigrated for employment and 12.59% due to marriage. 1.27% for business purposes and 3.18% in seek of employment. However there were 29.62% of them were on various other reasons, which include the ignorance of the informants about the reason for their parent's/elder's immigration. The district wise data are presented in the Table-123.

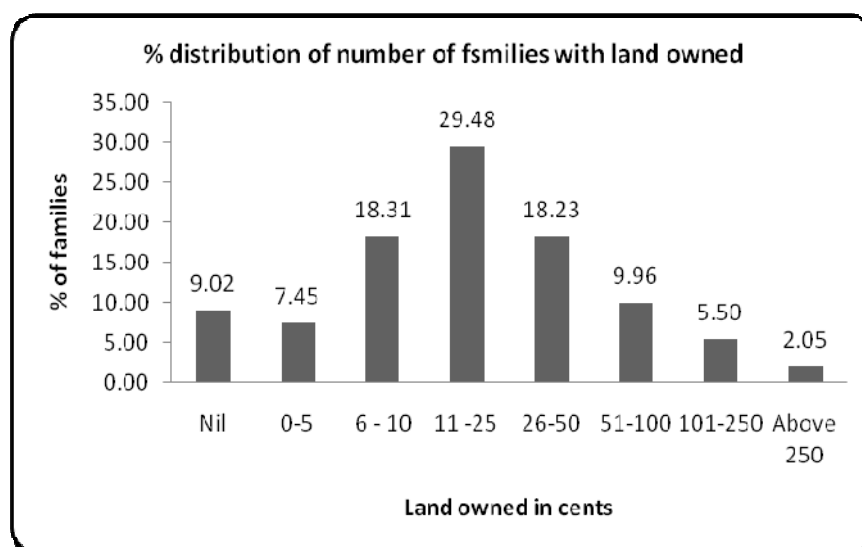

- 7.7 Out of the total immigrants from other states, the duration of immigration of the 43.36% of them is above 10 years and 6.88% of them, below 1 year. (See Table-124). 56% of the immigrants from other states are permanent residents in Kerala whereas 44% temporary residents. 97% of the immigrants in Kottayam are permanent residents and in Idukki it is only 14%.

Chapter 8

Basics facilities available to the families of migrants

8.1 The survey also tried to get information on the basic facilities available to the families of the migrants and return migrants.

Regarding the land owned by the families of the migrants, it is ascertained that 9% of them do not own any land, 29% of them own 11

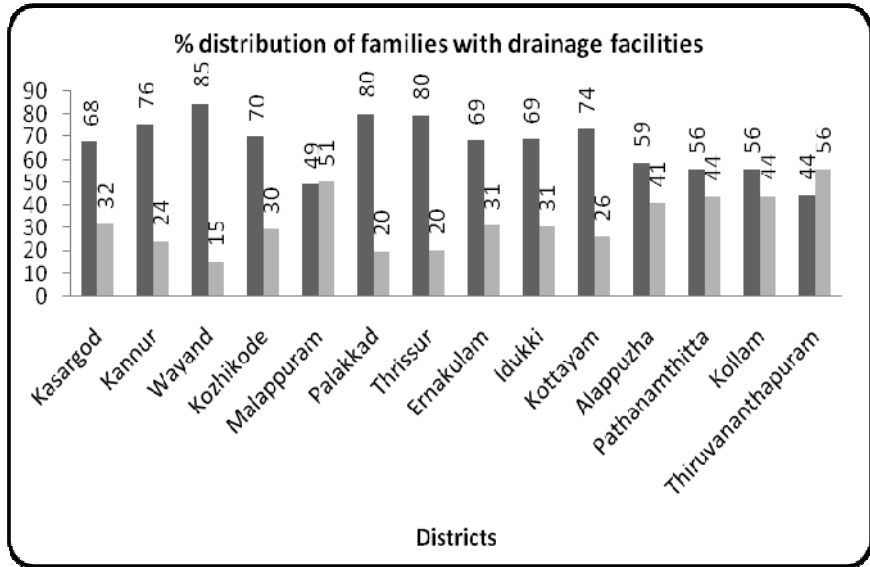

to 25 cents of land and 18% of them own 6 to 10 cents & 26 to 50 cents of land. (See Table – 126). In the case of land otherwise possessed, i.e. land encroached or possession of unowned lands, by the families of the migrants and return migrants, 84% of them do not possess any kind of such land. (See table-127).

8.2 In the case of ownership of residence, 93% of the families own their own residence. While 3% of the families do not have own house and staying in rented houses, 1% of the families have own houses but staying in rented house due to various reasons. 49% have pucca type of residence and 45% have semi-pucca type of residence. (See table – 128 & 129).

8.3 Regarding the availability and accessibility of drinking water facilities, 79% of the families have their own well, while 9% of them depends the pipe. 2% of them depending the public well and 3% of them depend the public tap. 89% of the families have the facility within their

premises while 9% of them have to go outside the premises. (See tables 131 & 132).

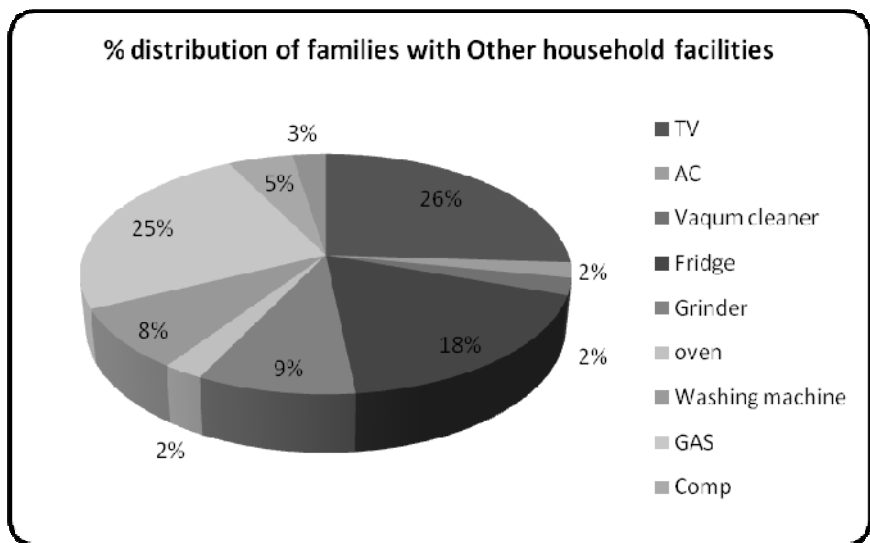

8.4 Sanitation in Kerala has been a big concern always. Same is the case with Drainage, which is the natural or artificial removal of surface and sub-surface water from an area. As per the survey, 88.43% of the families have toilet/sanitary facilities while 2.37% do not have. The survey reveals that 64% of the families are equipped with drainage facilities while 36% do not have.

Interestingly, in Thiruvananthapuram, the capital city, the ratio is 44:56 while in Palakkad and Thrissur it is 80:20. (See tables 133 & 134).

8.5 In the case of electricity facility available to the families, 4% of them do not have electricity connection and 4% have a free electricity connection.

On considering other household facilities available to the families, only 2.04% of them have AC installed in their

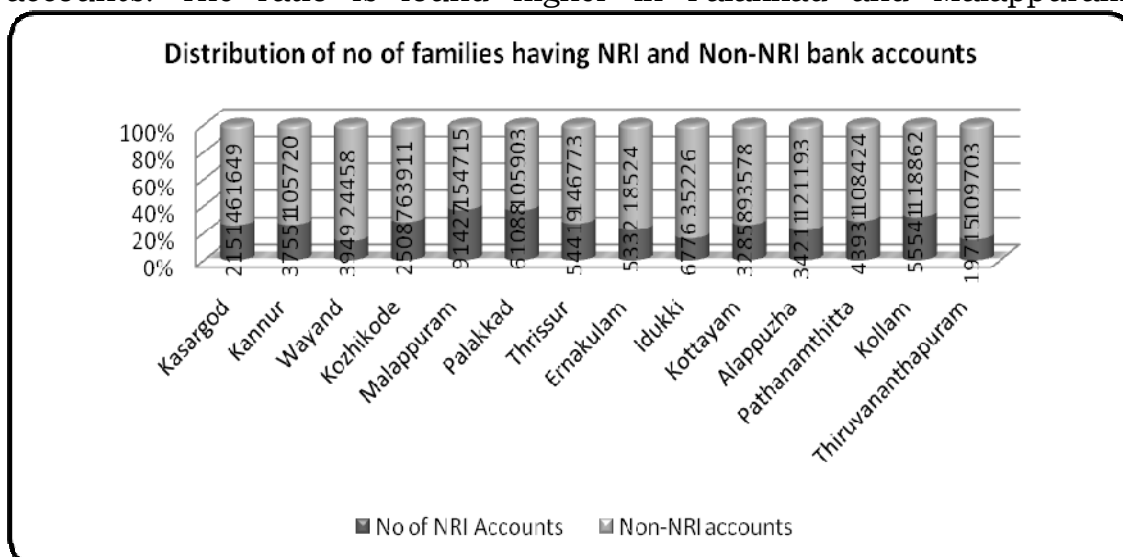

residences and 2.56% of them have internet facility available. 25.98%

have television and 24.55% have LPG connection in their residences. (See tables 135 & 136).

8.6 Owning a vehicle has become a status symbol for many people in the State. The survey tried to fetch information on the number of vehicles owned by the families of Migrants/return migrants. 65% of the families have Scooter/Motor Cycles. 28% of them have either Car or Jeep in their residences. See table 138 for detailed district wise data.

8.7 Bank savings accounts are a critical part of everybody's financial picture. If you need a safe place to keep money, a bank savings account is often a good choice. There are different types of bank accounts that one can use for different reasons. The survey results show that 28% of the families hold NRI account with different banks and 78% non NRI accounts. The ratio is found higher in Palakkad and Malappuram

Districts, where the ratio of NRI account holders to Non NRI account holders is 37:63 and lowest in Wayanad, where the said ration is 14:86. The district wise details are given in Table 139.

Chapter 9

Monthly Income & Expenditure on households of families of migrants

Monthly Expenditure on household

- 9.1 Patterns of spending give a good picture of consumer behaviour, showing various social, economic and marketplace trends at the household level. In the current economy, many of us are living on a budget and looking for ways to reduce expenses on every household activity. According to the survey, around 68% of the families spend in the range of Rs.2000/- to Rs.5000/- on food. In the case of clothing, 67% spent in the range of below Rs.500/- and 26% spent in the range of Rs.501/- to Rs.1000/- (See tables 140 & 141).
- 9.2 In the case of expenditure on electricity and gas, 74% of the families spent below Rs.500/- and 24% spent in the range of Rs.501/- to Rs.1000/- . In the case of drinking water an estimated 1.74 lakhs people spend money for drinking water and among them around 98% of the families spent below Rs.500/-.(See tables 142 & 143).
- 9.3 Nowadays, telephone, cable, internet and mobile phones have become popular with everybody since they are a convenient and easy mode of communication and information sharing media. According to the survey around an estimated 12.20 lakh families of migrants use telephone, cable and internet facilities and an estimated 13.6 lakh families use mobile phones. From among them, around 87% of the families spent below Rs.500/- on telephone, cable and internet and 11% spent in the range of Rs.501/- to Rs.1000/- . In the case of mobile phones, around 90% of the families spent below Rs.500/- per month and 7% spent in the range of Rs.501/- to Rs.1000/- . (See tables 144 & 145).
- 9.4 According to the survey an estimated 12.16 lakh families of migrants spend money monthly for health related issues and an

estimated 8.9 lakh families spend money for education of their kids. Among them, around 67% of the families spend below Rs.500/- monthly on health, 21% spent in the range of Rs.501/- to Rs.1000/- and 8% in the range of Rs.1001/- to Rs.2000/-. Regarding expenditure on education, 50.13% of the families spent below Rs.500/- per month, 26.62% families spent in the range of Rs.501/- to Rs.1000/- and 13.43% spent in the range Rs.1001/- to Rs.2000/-. (See tables 145 & 147).

9.5 It is estimated from the survey that 6.2 lakh families spend money every month for paying rent, 5.4lakh families on entertainment and 5.17 lakh families on vehicle fuel. The survey reveals that 36.80% of the families spent below Rs.500/- on paying rents to the houses, 20.41% spend in the range of Rs.501/- to Rs.1000/- and 21.49% spent in the range Rs.1001/- to Rs.2000/-.18.64% of the families spent an amount from Rs.2001/- to Rs.5000/- for paying rent every month. 35.61% of the families spend in the range of Rs.501/- to Rs.1000/- for vehicle fuels. Expenditure on entertainment is below Rs.500/- for almost 93% of the families. (See tables 148 to 151).

9.6 The survey tried to fetch information on the loan liability of the families of NRIs during the past 10 years by considering the different types of loans such as agricultural loans, education loans, housing loans, marriage loans, treatment loans, migration loans, employment loans, vehicle loan and others. (See tables 152 to 160).

9.7 In the case of repayment dues, around 5.33% of the families have repayment dues above Rs.5,00,000/-. 22.58% of them have loan repayment dues in the range of 2 to 5 lakhs. For district wise data, see table – 161.

Monthly Income

9.8 Another important data collected during the survey is the monthly income of the families of NRIs and return migrants from Agriculture, Daily Wages, Monthly Salary, Service pension,

Welfare pension, Income from abroad, Income from other states, Business/Trading, Self employment and others. Estimated number of families which had the monthly income from the above categories is given below.

SlNo.	Income from	Estimated number of families
1	Agriculture	4,35,498
2	Daily Wages	3,15,490
3	Monthly Salary	1,55,726
4	Service Pension	1,01,022
5	Welfare Pension	50,701
6	Abroad	10,06,910
7	Other States	1,47,982
8	Industry/Trade	99,493
9	Self Employment	1,10,480
10	Others	2,23,568

9.9 The survey results show that 38% of the families had monthly agriculture income below Rs.500/- and 45% of the families had income from daily wage in the range of Rs.2001/- to Rs.5000/- (See tables 162 & 163).

9.10 Most of the family members of the migrants had some sort of employment which offers a monthly salary in the state. 37% of them had monthly salary in the range of Rs.5,001/- to Rs.10,000/- and 32% of them have monthly salary above Rs.10,000/-. Likewise, 43% of them have service pension in the

range of Rs.5,001/- to Rs.10,000/- and 21% have above Rs.10,000/-. (See tables 164 & 165).

9.11 In the case of those who receives welfare pension, 74% of them receives welfare pension less than Rs.500/-. 5% of them receives in the range of Rs.2,001/- to Rs.5,000/-. (See Table-166).

9.12 Among those who receives income from abroad, 44.21% of them receives Rs.10,000/- or more and 41% of them in the range of Rs.5,001/- to Rs.10,000/-. Among those families who get income from other states, 35% of them gets in the range of Rs.5,001/- to Rs.10,000/- and 30% in the range of Rs.2,001/- to Rs.5,000/-. (See tables 167 & 168).

9.13 33% of the families receives their income in the range of Rs.2,001/- to Rs.5,000/- from industry/trade and 30% in the range of Rs.5,001/- to Rs.10,000/-. In the case of those families who gets income from self employment, 31% gets in the range of Rs.2,001/- to Rs.5,000/- and 25% in the range of Rs.5,001/- to Rs.10,000/-. (See tables 169 & 170).

9.14 Investing money in different ways and schemes isn't just for the wealthy. Almost anyone can invest at least a little money to investments, keep close tabs on it, and wind up with more money than he or she started with. The survey tried to fetch information on the investment of money by the families of NRIs and return migrants on land, house construction, other building construction, bank deposits, vehicles, industry/trade, shares, bonds, mutual funds, gold and others. Estimated number of families who invested money in various above categories is given below.

SINo.	Investment in	Estimated number of families
1	Land	98,064
2	House construction	3,23,275

3	Other building construction	19,220
4	Bank deposit	2,95,360
5	Vehicles	1,13,768
6	Industry/trade	12,650
7	Share/bond/mutual fund	22,048
8	Gold	2,56,987
9	Others	98,766

9.15 The number of families invested in the above 9 categories classified into 5 groups viz. Below Rs.1,00,000/-, Rs.1,00,001/-to Rs.5,00,000/-, Rs.5,00,001/-to Rs.10,00,000/-, Rs.10,00,001/-to Rs.50,00,000/- and above Rs.50,00,000/-. The detailed district wise data are presented in the tables from 172 to 180.

Chapter 10

Summary of Findings

Kerala is a state located in the south-west region of India on the Malabar coast, bordered by Karnataka to the north and northeast, Tamil Nadu to the east and south, and the Arabian Sea to the west. Kerala's economy depends on emigrants working in foreign countries: mainly in the Persian Gulf countries such as the United Arab Emirates or Saudi Arabia, and remittances annually contribute more than a fifth of GSDP As of 2008. Objectives of this survey was To study family status of the migrants, to estimate the number of return migrants to the state especially due to the financial crisis, to study the return migrants problems, to estimate the total foreign remittance to Kerala Economy etc. The study covered 2.67 lakhs household in the state with a fair proportionate representation from all sectors.

The study reveals that 14.25 lakh Keralites are residing outside India and 3.41 lakh Keralites residing outside the State.

The different groups of household viz., households with migrants, households with return migrants and household with immigrants were analysed separately with respect to various aspects. As per the study, it is felt that, the global economic recession affected many of the migrants working in the private sector and it lead to the loss of employment to many and to many others, their remuneration decreased marginally. The following are some of the gist of findings from the study:

SYNOPSIS

- ✚ There are 67.23 lakhs households in the State in 2010.
- ✚ The usual resident population of the state during the period is 307.22 lakhs

- ✚ There are 14.25 lakh migrants abroad and 2.39 lakh returned migrants from abroad.
- ✚ There are 3.41 lakh migrants to other states and 21.2 thousand returned migrants from other states.
- ✚ Out of the total of 14.25 lakhs persons residing abroad, male population is 12.54 lakhs and female population is 1.70 lakhs
- ✚ The maximum employed migrants are in U.A.E with 5.27 lakhs followed by Saudi Arabia with 3.79 lakhs.
- ✚ The maximum number of migrants abroad are from Malppuram and 93.43% of migrants abroad from Mlappuram are employed.
- ✚ The maximum numbers of employed migrants abroad as well as to other states have no technical educational qualifications.
- ✚ 66.56% of the migrants are married males and 21.36% of them are un-married males.
- ✚ 1.92% of the migrants abroad have citizenship in other countries also.
- ✚ 62% of the migrants abroad are working in the private firms and 3.21% in Govt/Semi Govt firms.
- ✚ 74.53% of the migrants got their job abroad as per their visa agreement whereas 9.20% of them couldn't get job as per their visa agreement.
- ✚ In the case of receipt of salary, 62.24% of the migrants received their salaries as per their visa agreement.
- ✚ The estimated amount spent on procuring the visa amount to Rs.8858.47 crore out of which, Malappuram alone contributed 24.53%.
- ✚ 28.73% of the migrants abroad enjoy the privilege of leave with salary while 49.89% not.

- ✚ 77.74% of the migrants trusted bank as the medium of money transfer and 9.33% of them trusted different agencies and private firms.
- ✚ 952 out of 1000 migrants have not received any concessions from any of the Pravasi Suraksha schemes. However, 20 per 1000 migrants received the concessions from the NRI welfare fund and 15.33 per 1000 migrants have the NRI ID card.
- ✚ 0.39% of the migrants abroad are found absconding with male to female ratio 92:8.
- ✚ The maximum number of people migrated was to Karnataka (26%) and to Tamil Nadu (22%).
- ✚ In the case migrants abroad and that to other states, maximum number of migrants was from the age group of 18-45.
- ✚ 52% of the migrants to other states are married and 47.76% unmarried.
- ✚ 40.21% of the returned migrants from abroad were from U.A.E followed by Saudi Arabia with 28.92%.
- ✚ The maximum number of return migrants in Kozhikkod, Malppuram and Palakkad were from Saudi Arabia and in case of all other districts, it was from U.A.E.
- ✚ Maximum numbers of migrants abroad as well as to other states possess atleast Secondary education.
- ✚ Loss of employment is the reason for 43.59% of the migrants to return back to own country.
- ✚ 68% of the migrants did not receive all the benefits as offered by the employers from the establishments while returning to home country.

- ✚ 92% of the return migrants didn't receive the countenance of any of the Pravasi welfare schemes.
- ✚ 85.76% of the out-migrants were having employment visa while 3.10% of them were on a visit visa.

LIMITATIONS.

The method of collection of data was enquiry method by visiting the household of migrants. The information about the migrants was collected from the members of their family who was available during the visit. The migrated country or state, educational qualification and many another queries were properly reported by the informants. The type of job, category of work and information regarding visa were almost reported correctly. But in many cases, it was very difficult to collect information regarding financial parameters including bank account details as the informants were not willing to share even the known details. The information regarding the benefits offered by the employers to the migrant workers and the particulars of leave with salary etc. are mostly not fully known to the informants. However, they could report the available information to some extent. There were also hesitations in reporting the details in respect of income earned by the migrants and money received by the kith and kin of the migrants. However the available details of outstanding NR Deposit as on 31st of every year from 2005 to 2010 are collected from secondary sources and appended in the report.
